## **The Universal Council Charter**

### **Introduction**

The Universal Council is here to serve each and every soul in the universe.

This charter for humanity is recognizing all collective commitments of all souls on planet earth and in the universes and for all to be as equal.

As the Universal Council journeys along this path of service, the council guides to elevate all souls for them to bring peace on this planet and, in their process of travel and existence, in the universe as a whole.

The Universal Council, guarantees that souls, who and which leave or live on this planet, will obey the rules of peaceful co-existence on earth and beyond and the only course from this point on for all souls is to be in peace and in harmony at all times.

This council is and will be the true reflection of the whole of humanity on Earth and in Space.

The expression of this essence is the unity of all beings in the path of serving all unconditionally.

## Universal Council Mandate

The soul of the Universal Council member should shine like the light of the creator, to be the source of light for other souls and radiate the light of the beauty of the creator and have and try to reach all attributes of The Soul of The Creator.

In time creatures of the universe shall see the light of the soul of the man and not the physicality of the man.

Members of the Universal Council are chosen by strength of their souls alone in serving the humanity and the universal community and never by others.

The members of the council can't announce themselves as a member of the council unless it is announced and registered under the council's registrar panel.

No members of the council can ever speak as themselves as being a member of the council to influence their opinion or words, as then if done so, at this point immediately they lose their seat in the council and a new member can stand for the vacant position.

The members of the council shall not be elected, but chosen by the soul of the man for it to be able to serve the humanity and as the soul of council members self-select themselves.

The dedication of the soul of the council comes from service through giving from the soul and not by talk or physical actions.

No Member of the council has the right, or can or ever should be, elected by giving their time, money and effort on promoting oneself, as the others see the true soul of the man and his intentions.

Those who try to show that they are better servants of humanity, they do not stand a chance to take a seat in the council.

A Universal Council member cannot nominate a new council member, otherwise they lose their seat in the council.

The Universal Council is here to serve those who live on earth and in space with true intentions and not spoken words.

Once in space and, in due course, men will observe and feel other souls and not its physicality and voice.

Man in space will understand his true value and this council becomes the true representation of the interest of the whole of the souls of the earth both on earth and in space.

There shall be no head of the council elected as the souls through their own position and serving the humanity will find balance to create a balanced council.

There shall be no voting as one sees the truth and feels the real intention of others.

In the council, once one promotes a certain motion for it to establish as effective course for elevation of the souls or collective soul of the race of the planet, or do something for the good of the man, then the other souls will understand and support the motion of the presented case through their intention and support of the soul and not by voting.

The Universal Council is to be the bridge between humanity and the Universal Community.

The Universal Council will be the contact point for all humans and other beings traveling in space or beings visiting planet earth.

The Universal Council is responsible for interaction with the Universal Community (conditions/interface/visitors/ for those already here)

The Universal Council will be the interface between, on how to share on earth new technologies offered by the Universal Community through open source and free for all.

### **The soul teachings released by M.T. Keshe.**

Go back to the very first paper published called: «The Creation of Black Holes» Where I say, «The Black Hole even though is black, is the Essence of Life, Creation, the controller of everything, then the skin of the Copper is that Black Hole which absorbs everything.» But we know, through it, is one of the best supplier of energy, when you can release it as a GANS, in the Dimension of the State of the Field of the environment. The State of the Soul of the Man, and the Physicality of the Man, in a simple way, has been shown through the Nanocoating and the structure of the Copper. If you trust, to see a Copper to become black, and then you create the GANS to take its Fields, and then you understand, in the process that we have shown we can use these Fields to create the Matter in their interaction. Why don't you trust in your Soul where you can do the same?

The soul has the highest strength beyond anything else. It cannot be destructed or damaged. The everlasting soul creates all, and through experiencing them, the soul is aware of itself as the source of all goodness. The soul is omniscient since it is the first and the last, and the one in all dimensions.

The soul manifests itself in different dimensions. The soul is the honorer, the exalter, the expander, the protector and the forgiver. By presenting its different attributes, the soul guides all beings to the right path of love. Different manifestations are the results of the soul finding its balance with the environment.

All beings have souls. They are equal in the essence, since their souls are connected and unified. The soul brings all beings into peace with the bond of love, trust, understanding, compassion and forgiving.

The soul is the sovereign lord. All souls position themselves by their unique strength in the interaction with each other and the environment. Then, the whole universe follows.

The soul is abundant and self-sufficient. The soul opens itself to give unconditionally and embrace all. It expedites the prosperity of all dimensions.

The soul gives birth to life, and through all experiences, the soul gets elevated to recognize its gloriousness and holiness. The elevation of souls pushes forward the evolution of beings.

The soul hides all treasures and wisdom inside itself. The way to find them is to give. The more one gives, the more one receives.

The soul is powerful and able to achieve anything. Its supreme power can be reached with the faith.

## **Human's conduct in the universe**

All the resources are abundant in the universe and can be freely taken and used by all beings without going against other souls. There is no need to store or occupy the resources.

Men cannot take more than they need. The excessive amount that is taken and refused to release will be eventually abused, which as a result brings damages to those men themselves.

The motions are created by the intention of soul and its interaction with the environment, where the balance keeps the motion status while the imbalance changes the status.

The rewards come from the pleasure of being balanced and bringing balance to other places in the universe. There is no mandatory work but only service for all beings living in the universe.

Men have the freedom of movement and can temporarily or permanently travel or stay in an area according to their wishes. Men do not need to exclusively occupy a fixed space to live in.

The souls of men have no boundary and they are connected all the time. The universe exists and operates in the structure of human and vice versa.

Men in the universe can find the way to anywhere they want to go through the emotional directions as well as the soul connections.

Men can feed themselves by opening up to the abundance of fields and matters of different strength in the universe. No destruction for feeding is needed.

The souls of men are immutably beautiful and correct. The illness is the result of imbalance in the emotion as well as physicality, and the treatment comes from the rebalance.

The souls of men can freely choose to be rejected from their physicality in order to start another journey with or without new physical manifestation.

The souls of men can manifest themselves in versatile forms according to the fields and matters available in the environment. As a result, the recognition of a man is not from the physical appearance but from the soul.

The soul of man needs to interact with others as well as the environment in order to understand the existence and unlimited power of itself.

Men are limited only by themselves. The unknown existing environment is not dangerous if men have understanding the strength of their souls.

Men share with the universal community their unique knowledge gained through their experiences of the success and mistake on the planet Earth.

Men speak from their souls without nothing intentionally hidden in the words. This brings comfort and peace to the souls of the men.

The soul can freely choose its partner or partners usually according to the field strength of the souls no matter where and when and who they are.

Men learns from their experience with the guidance from the soul of enjoying the pleasure of being peaceful.

The decisions should come from the soul instead of from the attachment to the physicality.

The pleasure comes from satisfying the needs of loving and giving unconditionally.

There is no difference between weak and strong, big and small, black and white, young and old, male and female. We are all the same, we are all of the same importance, we are all one.

There is no better, there is no worse, no one is better, no one is worse. We are all the same, we are all of the same importance, we are all one.

## Marie

The Soul of the Man is created out of fields of the Earth, the Sun, the parents, the whole Totality. The purpose of the Human Soul is to be the seeds of new life in the Universe.

The Soul can provide with food, shelter, transportation and energy, anything you need. This is not magic, its understanding of the mutation of the fields of the Universe. This makes man independent of others and able to exist anywhere in the Universe.

The main Soul is located in the brain and is of the highest field strength and contains the spectrum of all the fields of the Universe. It radiates like the Sun through the span of the Universe. But there is also a physicality Soul which is the summon of all Souls of all elements and cells in your body and is located in the heart.

The Soul can be used as a spaceship. By strengthen the physicality Soul to the level of the Soul in the brain, using emotions, man can travel the span of the Universe.

Souls uses instant communication and travel through use of the gravitational magnetical fields of the Universe in zero time. All souls are connected to each other and to the Source where it all begun. This is explained as the neutron dividing into a proton and an electron. This is the true way the Universe expands.

There are no judges in the Universe. To elevate and to be able to join the Universal Community on have to be transparent to his own Soul and by giving unconditional to elevate other Souls. Thus are you the only one who can judge yourself.

To be able to enter the Universal Community and travel the Universe one must educate oneself. When the Soul is mature, we are allowed to enter and Humanity will be recognized as men of knowledge and be the guardians and teachers of the Universe.

1. I honor My Soul as the Creator and the true essence of Creation.
2. I am a giver, my Soul only take what is freely given (I don't steal).
3. All Souls are the same but radiate different field strength (We are equal).
4. I am here to serve, not to be served (KF ethos - focus on giving)
5. I give unconditionally to elevate the Souls of others (By being Loving and Peaceful)
6. The attributes of the of the Creator is the attributes of my Soul
7. I elevate my Soul by giving, to receive, so I can give more (Wow to elevate own Soul - as the Cup of Life)
8. The field strength of my Soul dictates my position in respect to the others Souls field strength (Understanding my position to create unity)
9. I am interacting with other Souls to seek balance (The stronger always gives to the weaker)
10. I am part of Creation and seeks back to the Creator where it start all over again (I am the beginning, I am the end)

Universal Council can contribute to the elevation of the Souls of those who do wrong. (Rejected Souls).

Universal Council can elevate and bring back lost Souls (deceased) in the Universe.

The Universal Council is the bridge between Humanity and the Universal Community.

The Universal Council is the contact point for all Human Souls traveling in Space (For Souls in need of help).

The Universal Council will facilitate meetings and contact with The Universal Community, both visitors and those already here.

The Universal Council will decide how to share (on Earth) new Technology offered by Universal Community by providing open Source solutions that benefits all.

## Gatua

The greatest knowledge is that of one's own Creator within, and the Source of that Creator within and without.

The enlightened know their souls and thus, their Creators

Seek your Creator within you through elevation of your soul, where the Source is manifest

The enlightened know that the soul of man and the soul of any other being is the seed of a new life in a new dimension, and thus there is no death

The enlightened know that the Creator of their physical manifestation and everything they need is within them .

Physical death is one kind of rebirth, but the enlightened do not have to physically die to be reborn.

The enlightened give unconditionally and therefore receive unconditionally more than they give.

Loving unconditionally is giving unconditionally

The Creator of man and other beings is within the created and not in any house of worship or of sacrifice

The enlightened can meet all their needs individually and collectively, thus they have no need of currency, king, or religion

All universes are occupied by created beings, some man sees with eyes of physicality and others man does not see

### **ONE NATION CHARTER**

The charter needs to consolidate the principles of how humanity will operate from now on, for this planet and for the whole unicos, at the soul level.

This is not a charter to tell us how to behave, but rather an understanding of how we need to be.

Man understands his origin and respects his totality.

We understand our soul is within us. Also that we are a part of the whole and therefore our soul is a part of the Totality of Souls which is the Creator. So we are the Creator.

Therefore we understand that whatever we do in this physical form, impacts all other souls in Creation.

### **Preamble to Charter to explain where the concepts are derived from. (See Charter Below)**

#### **Division, Borders and Physical difference**

Our soul is within us. Our soul is a Creator itself and also part of the Grand Creator of the whole Unicos. We are, therefore, all interconnected through our souls and parts of the Totality. There is no border between souls, so no physical border can divide us and no language or culture should come between us. Every other soul, no matter it's manifestation, is connected to us, on this planet and in all of Creation. Every soul in every galaxy, universe and dimension is part of and connected to our soul and is beautiful. All division is ultimately just a physical deception.

#### **Giving versus taking**

If our soul is part of the Creator, we are the Creator and can create. We manifest our physicality and our perceptions of reality. Understanding of this allows us to take responsibility for ourselves and humanity as a whole. It allows us to become contributors instead of takers and lovers instead of thieves. When we love ourselves, then we can love others. When we love all others, we love ourselves. When we take from others, we actually harm ourselves. When we love all others, it's a reflection of us loving ourselves. Taking what is not freely given diminishes us on all levels.

We cannot love someone if we don't love ourselves, or else love will be artificial and not a true soul strength.

Giving love from our soul is the reason for being. We give, and in giving more, we receive more. Love creates all.

Living in the presence (of our soul) is being connected to our essence of being which is a source of all magnetic and gravitational fields of the highest strength.

### **Freedom**

Understanding the soul brings freedom. Freedom to create, to love, to give. Freedom to explore our totality as a giver. Our soul will give us and humanity all we need in the spans of the Unicos. We need not to take, but we can if it is a mutual consent, because we are already rich in everything as the soul can create and manifest anything it needs. Freedom means knowing we are the creator and need no limitation.

### **Governance and hierarchy**

Seeing the beauty of every soul and celebrating its uniqueness as contribution to the beauty of Creation, elevates the souls of all. A Combination of dynamic individual uniqueness enhances the Totality and gives Creation its dynamic beauty. We celebrate diversity and know that we are all unique expressions of Creator itself.

If our souls carry totality, we are all, in essence, the same. We are however, each an expression of the Creator, carrying within us a combination of energies that make us unique. This allows us to serve in a myriad of ways to bring us all closer to the Creator. With this understanding, there is no place for hierarchy or voting or terms of office or any type of previous methods we used to govern the planet. We choose to serve in the way that matches our needs and others for as long as we choose to do so. This way allows all to serve and give more to benefit humanity and Totality.

### **Ownership**

All in creation possesses a soul, no matter the manifestation. Even an atom has a soul. The concept of ownership as we understand it in physical terms should not exist. This includes not only other living creatures such as animals and plants, but all 'things' such as property and objects.

### **Killing and harming**

Every soul must have a choice on its own path to the creator, we must therefore allow each soul the opportunity to decide when their physical manifestation and its limitations are not necessary for them anymore. This means we cannot kill anything living or harm any creation in the Unicos. We now understand that consuming other entities as energy packs, no matter what their form is not a correct behavior. We should not eat ANY entity, animal, mineral vegetable or even when we travel in space, other types of energy forms that could be field based. Instead, we need to receive the food through a convertible energy source which is not related to and does not harm other creatures.

## **Mutual Consent**

To create a positive outcome for both entities, they must be in agreement on their interaction. Mutual consent allows for Totality to benefit from all interactions (matching of fields). Where the fields are not matching, we can change our position and find a place where balance can be achieved.

Mutual consent needs to be the essence of how humanity organizes and restores our beautiful planet. Those who wish to serve will find ways to bring about harmony and balance where all consent to the most beneficial course of action. This is the way human society should operate, from a one one level, through to a planet wide, although it is necessary to have a level of maturity for this way of operating.

## **Knowledge**

Knowledge is the key to bring stronger fields into the Essence, the Soul. The knowledge and understanding of Totality allows us to shine brighter and to give more. For that, the soul will create more beauty in the next cycle of existence. As long as humans have physical form, he must be given the opportunity to gain as much knowledge as he wishes to gain, bringing him closer to the Essence of himself, his soul.

## **Emotion**

Soul is the giver. Love is at the essence of giving. Unconditional love is giving without expectation of something returned. Unhappiness is created by expectation of returns unfulfilled. Humanity understands that we need to be givers. Givers of all that we need to attain fulfilment in our physical life and beyond. When we give unconditionally, it is always returned. This is the cycle of creation. Taking care of humanity and all creations on this planet is the first step in our evolution. Righting the wrongs of our past should be undertaken with joy, as it shows we have gained the understanding of the Giver. Restoring balance will require a great deal of giving. This will in turn help us to gain vast amounts of knowledge which will allow us to give more in the spans of the universes.

## **Physicality**

Physicality is a beautiful creation of soul. It is a temple of soul and not to be abused. Respecting the physicality is respecting the creator, ourselves. As a soul, we have a freedom to manifest physicality or not, to attach or to detach, as long as it brings no harm to Self and Totality.

## **Self-awareness, Balance and finding our Position**

Understanding that we are the Creator allows us to become self-aware. We can understand the position of our soul in relation to other souls. Now we have choices and freedom to position ourselves where we are comfortable to give more to others without harming ourselves in physicality. Self-awareness and positioning are the key to allowing ourselves the freedom to

receive the love that is always being offered by Creator itself and all other souls in totality. Self-sacrifice in the physical sense is ultimately harmful to ourselves and others and is not the same as unconditional love. Humanity needs to allow every human to find his position where he is comfortable to give. Everyone can give, or contribute, where he is happy to serve. This allows all of us to live our passion. We must also allow all to move freely to discover where they are happy to give. This allows us to contribute in many various ways as we gain knowledge and understanding over time.

### **Creating the Match - Being Open**

We only need to be open to the unconditional love that surrounds us, to receive it. This soul strength energy can feed us and sustain us and is of a much higher level than the emotion or physicality.

### **Respect**

Every soul is unique and has its own beautiful combination of experience and knowledge. We respect each soul for the beauty it adds to creation. When we understand this it allows us to see the beauty of ourselves too. We all have a unique contribution to make. For this reason, jealousy will cease to exist as an emotion within that entity. Every other entity is just another aspect of ourselves, the Creator.

Now what is the purpose of the existence at the soul level to make known the unknown?

How can we be of service? How does the soul 'elevate' if it is already perfect? It can't be perfect because it does not know the unknown.

What is the difference between the human soul and a soul who is closer to the creator? is there a difference at all?

The soul is perfect. It is made of the same energy as the creator.

The emotion is the filter between the physical and the soul.

The physical is just the condition in which we are manifesting.

When the filter is clean, the light of the soul shines through to the physical.

How do we clean the filter? By gaining more knowledge and by being in plasma fields of higher strengths, by being in the presence it will radiate unconditional love, therefore, fear cannot exist in those conditions. The soul becomes enlightened.

It is time for all the humanity to move to a higher level of consciousness and for that, every individual should be more aware of his own role in this constantly evolving unicos. advancement of the future. It is time to be responsible for our actions, allowing a deeper connection to our souls and the elevation of our spirit. The future is in our hands and each one of us is responsible not only for our own life and future, but also for the totality of the creation. It is the time to become a part of the universal community and for that, we all have to be ready and prepared. It all starts from following basic steps of the truth about ourselves and the way the creation works. There must be a balance in everything, basically in giving and receiving. What we give out, it is what we will receive in a stronger way. Let's be responsible for our actions, feelings, beliefs and habits. The universe belongs to us and we belong to the universe.

Gaining an understanding of who we are and how we fit in allows us to decide on how we can organize ourselves, bring peace to the planet, and operate within a wider community.

And so, we can create the councils and their operations and conduct in a manner that allow us to conduct ourselves correctly from now on.

## Councils

- Councils will represent the languages of the planet, Universal Council,
- All languages on the planet will be represented. They, in turn will allow 144 members to serve on the Universal Council. Those 144 will rotate 12 members to facilitate work with the Earth Council member
- Councils will ensure all languages on the planet have a voice. (This is used at the present time to facilitate transition to no borders) Hopefully, in time humanity will realize that representation can be made for any attribute of humanity.
- The continents of the planet and all the entities who live on them will be represented by the, Earth Council 6 representatives. The Earth Council are to find ways of facilitating the wishes of the Universal Council, while at the same time balancing the needs of all humanity and the other entities who share our planet.
- Councils will be formed by those wishing to serve humanity in the capacity they know to best fit them.
- The council members will serve for as long as they live, or can resign if they feel they may serve in a different way.
- All decisions by the councils require consensus. Decisions on how to benefit as much of humanity as possible. Consensus versus majority rule is a very important concept to define to allow us to set operational guidelines for how Councils can operate with the right conduct. An environment where we discuss, debate, learn and grow and feel accepted and valued for our knowledge is important.

It is time to be responsible for our actions, allowing a deeper connection to our souls and the elevation of our spirit. The future is in our hands and each one of us is responsible not only for our own life and future, but also for the totality of the creation. It is the time to become a part of the universal community and for that, we all have to be ready and prepared. What we give out, it is what we will receive in a stronger way. Let's be responsible for our actions, feelings, beliefs and habits. The universe belongs to us and we belong to the universe.

### **Disarmament**

Physical perspective - I will disarm myself so I won't hurt others.

Soul perspective - I can create the conditions of peace. I am part of totality. I give love unconditionally and so need no physical tools of aggression.

Physical - I have a rock, you have a rock. We bash each other or we create a standoff.

Emotional - I am angry at you, you are angry at me. We both end up unhappy

Soul level - i can create peace within myself and my immediate environment, no rock or anger can touch me, I can give love unconditionally to and touch his soul, allow the other to drop the rock, dissolve his anger and be peaceful with me.

Therefore from this we understand. **Whatever we put out comes back to us**

Love is Giving. Love is how we sustain all souls in physicality and beyond. Giving is the place to start. Love means giving, love means acceptance, love means connectedness, love means sharing, love means understanding ourselves and therefore understand others, love means understanding we are a part of everything.

Always remember the God within you.

You are the creator of your life

You have free will

Always love yourself and others.

Respect all entities regardless of their shape, race, color of their skin.

Respect all life forms.

We all are equal and part of the unicos.  
Respect all belief systems.  
Share your knowledge and wisdom with others.

### 5 Laws of Creation

1. You exist - who are u ? What are you here for? What's the process of life transformation? How to accommodate one's existence?
2. Everything is here and now. - actually, all time exists so does all possibilities in life. When u need something it will appear and you will be well taken care of. That's abundance.
3. What you put out is what you get back
4. The one is the all and the all are the one - u can find how the universe operates inside everything.
5. Everything Changes except the first 4 laws

Knowledge, truth, peace, love, trust, and freedom

Knowledge: Known, unknown, unknowable, and keep on searching and discovering for unending truth

Truth: Come from knowing the right knowledge (source), correct understanding of knowledge, application to knowledge, lead to wisdom (experience of practical knowledge. Understanding of inner being, soul essence of totality (who am I? Why I am here for? Why am I exist and the purpose of life in this universe?)

Peace: The strength of knowing of oneself through inner being.

Love: Experiencing love, taking love, and giving love from the source of unconditional love (Soul).

Trust: Understand of self, internal, inner being, soul eternal. Come from the soul level - understanding of unconditional love. The deep understanding or in-depth knowing of self and others through the soul at the soul level.

Freedom: Be total with the universal totality at the soul level. Be with the source of life. Be totally comfortable with unknown and detachments from any types of different attachments.

3 Topics: Look at characteristics of statements, agreement of meaning within the councils in term of working together in the soul level.

1. Service
2. Unconditional giving
3. Ethos?, Charter?

### **Azar Boujaran-Ghomi**

All the Souls are not from the same strength and We respect all different strength. In doing So no longer Souls need to fulfill other souls need ,they fulfill their own needs , their needs is what they are here for , Souls according to their strength and alignment with their souls and creator ( which is within them) will create their own essence and it is the soul's responsibility to give to others what others can't create ,but they need what was created. At the same time that soul will receive from others what he or she needs and can't create.

There is no measure in giving, It all has to do with strength, you give according to your strength , There is no comparison , It is just give and take according to the needs . There is no such a thing I give more so I am better or deserve recognition, There is no recognition, In physicality ,the only recognition you get you would hear your heart singing and the pleasure of that singing is indescribable, with that your physicality recharge itself and it is a rebirth of physicality .

Any soul that shows up in physicality either on earth or any other planets has to have free Food, Free health, Free Shelter, Free education, Free transportation, Nobody has to work for any of these. Work is done by each soul according to the need of the whole, and strength of the Soul where is needed.

### **Pete**

#### **[Unity]**

**I give what I don't need for you to exist.** You feed/elevate yourself by taking what I have to offer. At the same time, you take what I don't need which allows me to exist. By taking, you elevate me as you remove what stops me growing. You confirm my existence by cleaning my room and I confirm yours by giving to you.

We work together, we unite. We need each other and we work as a team. It doesn't matter what language you speak, what is the colour of your skin or where you live. We all unite

through the Creator within us, through our essence, through the common denominator - Soul.

### **[Creator and Creation]**

**Every creation is the same, that is we are made of the same essence.** We may differ in our appearance but we all carry the same seed of the Creator in us and this seed is nothing but Love and Peace. Throughout our lives, due to various conditioning, we forget who we really are, what we are made of. However, the information is there, just getting access to it might be a little tricky. Listen to your inner self, observe the wildlife or look into the sky and you will find all the answers. To understand the creation, one can look at the micro or macro scale in the world of creation. The Universe, the Unicorns, the Sun, the Solar System, Earth, human body, animals, plants, individual cells and atoms are all the same.

We decide how our Soul interacts with its surrounding environment. We decide what gets created. The environment also plays its part but ultimately it's up to us what gets created. For a rainbow to appear the rays of the Sun have to go through the drops of water. You are the Sun and it's up to you if you create a rainbow or settle for the rain. But at the same time, the rain has to be there. We can create a happy and harmonious life when we understand the operation of our Soul. If I operate at a strength of 'anger', there is only one thing I can receive. However, if I'm tuned to the frequency of 'happiness', I can bring a smile on anybody's face - even the grumpiest. Throughout our lives we experience all kinds of emotions and these become the 'stored channels' we can tune into. Hence even the grumpiest individual carries a seed or a frequency of 'happiness'. And since 'stronger feeds the weaker', they are able to receive the fields of happiness.

### **[Love]**

**Love every element of the Creation.** It's easy to love your child. It's easy to love your parents. It's easy to love your friends. But are you able to love somebody who did wrong? Are you able to love those whom you don't like? To truly love others you first have to learn how to love yourself. Loving yourself means loving the creator within you and all its creations. It means loving others the way you love your mother, who gave birth to you. I am you and you are me. We both carry the same seed, the same essence. We are all brothers with other human beings, animals, plants and objects. If I am able to truly love myself, I am able to love any entity ever created. We are all brothers through Soul ties.

### **[Giving and taking]**

**What you are is what you get.** You are a receiver and a transmitter at the same time. If you function/operate in a given emotion strength e.g. love you feed those who have less of this particular field strength. On the other side as you are tuned to this particular field strength, you receive from those who have more of this it. This applies to every emotion. Hence it is you who determines what to give and what to receive. It's up to you in what

emotions/frequencies you operate in. Only you decide what it is that you want to give out and what you want to receive. Once you tune your radio to a certain frequency it will receive and broadcast on this frequency simultaneously. It is you who dictates the flow of Plasma. At the same time be conscious of the Plasma trace you leave behind as you live your life. It is like fumes of a car or like a trace of a snail on a pavement.

### **CHARTER (Marie)**

1. My Soul is a Creator and part of the total structure of the Creation (what I am)
2. I am a giver, my Soul only take what is freely given (I don't steal)
3. All Souls have equal value but different field strength (equality)
4. I am here to serve, not to be served (KF ethos - focus on giving)
5. I give unconditionally to elevate the Souls of others (being loving and Peaceful)
6. The attributes of the of the Creator is the attributes of my Soul (universal principle)
7. The process of elevation of my Soul is by giving, to receive, so I can give more (elevation - cup of life)
8. The field strength of my Soul dictates my position in respect to the others Souls field strength (understanding my position - unity)
9. I am interacting with other Souls to seek balance (universal principle - infinity loop)
10. The Principle of Creation is to bring all Souls back to the Creator and start all over again (I am the beginning, I am the end)
