

# KF PLASMA TIMES

**MAY 2019, 11<sup>TH</sup> EDITION**

## Heartbeat of the Soul

Manifestation & confirmation of every living entity's existence. The true peace!

## Mining Revolution

New way of material creation

## Elevation of the Hydrogen Ion Potential (pH)

Water pH changes when in contact with GANS / CO<sub>2</sub> Plasma

## Welcome to the new trimester

Second Trimester  
May 6th - July 24th, 2019

## Field Replication Unit

The fields can now be easily replicated with the new device

## Carbon-14

Balance connection a lock between physicality and soul

# Carbon-14: Rotation Without motors

by Keshe Foundation

262nd Knowledge Seekers Workshop  
<https://youtu.be/VgNGpve4Haw?t=9487>

You travel 24 hours a day, with the speed of the planet of its own. You travel with the speed of 10.000 to be the passenger of this solar system. You travel with the speed of 100.000 to be the passenger of the Galaxy. And you travel with a speed of 1 billion to be a passenger of the Universe. Every one of them, therefore, has a field force effect on the creation of the man. This is how at the speed you travel, the collision you create leads to the creation of.

If the speed of this planet was not 1500 or 1600 km/h to create its 24 hours, and you would have traveled at 2200 rpm, otherwise we call it km/h, that your day was 16 or 15 hours, then that speed dictates the creation of a different field, in respect to the atmosphere of this solar system. If that creates the speed, which means should be another field force exerted by the Sun on the Earth or the combination of a mixture of the Earth itself, or our annual rotation becomes 200 days on the same orbit, it means we are playing fast.

It means we create, we produce interaction of different fields and the structure will change on this planet. You turn up a grinding stone and you hold your knife fixed to the position. Does it create the same spark at 1600 rpm, compare with 2200 rpm? It is totally different. The environment of this Universe, the speed of rotation of it, the speed of rotation of the Earth, the speed of rotation of the solar system has an effect on the creation of elements, in different positions of this solar system, or this Universe, or this Galaxy.

That combination has its enforcement on the others. Not only we get the fields or radiation from the interaction of the field of the Earth and Sun. We get radiations, we

get fields from outside the solar system, which in their interaction it affects our life.

Other things affect us and it comes into it, it dictates part of our structure. We are not just connected to 24 hours field strength of this planet, because now the field of the Sun counts too. We have a common denominator at the end of it, which is Carbon-14, which again affects our condition to the speed of the travel, of the field strength of the soul of the man. We call it a soul but it is the packages of the energy, which have in line accepted to be in conjunction with the fields of this planet. Understand a very simple principle: if we have no motors, that we do not have, we do not see any motors rotating this planet. Then we have no motors to rotate the galaxies in the spans of the Universe. How stronger the field strength of Carbon-14 or the winds of the Universe have to be, that it can create such an interaction, rotation with, and cause of the galaxy to rotate? The speeds of the fields of the Universe are many multiple larger than one billion. How you get one of these children windmills and blow on it as it has no motor. The speed you blow the air dictates how fast it goes.

There is so much surplus energy, that the speed of the blade cannot catch up with or it is not enough. If the winds of the Universe can create the galaxies to move at 1 million km/h, how stronger they are that in slowing down in the interaction matter states, they create? No man has ever managed to measure the speed of magnetic fields. Be it in the matter state, be it in the speed of the universal magnetic fields. Then you can travel the speed of the Universe, at any speed depending on why you lock in yourself, for what reason.

Then it is not 9 times, is the order of magnitude 9 times the speed of universal magnetic fields. That energy of the extra neutron is dictated and controlled by the universal field forces. It has no friction. It is purely on a speed of the center, the principal matter speeds of itself. It is not anymore the order of multiplication, it is in order of magnitude. The speed of the Carbon-14 must be dictated by a higher speed of order from outside the Universe. Which condition of it, part of it, is connected to the speed of the travel of the soul of the Creator? Then, **can we create a portal**, that can attract travelers of different universes?

# BLOOD CIRCULATION: CAGE FOR THE SOUL

by Keshe Foundation

273rd Knowledge Seekers Workshop,  
<https://youtu.be/38DoLxxzr8Q?t=1452>

We speak about the soul of the man, the brain of the man, and the heart of the man. One of the ways that the physicality of the man has engaged and slaved the soul of the man is through the blood – or, as we say – the emotion of the man, where the emotion of the physicality is transported.

If you are familiar with the world of physics on Plasma technology you know places like CERN, places with most advanced plasma technologies, Tokamak systems (the Russian-based nuclear fusion systems) which are a pure plasma. We have a plasma inside, but to control and maintain the plasma, we need to create a magnetic field around it.

The plasma in the center is the soul of the man, and the current which keeps this plasma under control to keep the charge and floating within the center of the brain of man is the circulation of the blood of the man around the skull of the man. It transfers its energy and according to the energies it holds onto the soul of the man.

This is why when the man dies in the physical dimension, this cage, this electromagnetic field, which comes from the pulse, from the rotation of the blood of the man is broken. Then the soul of the man is free.

This is how the physicality has engaged the soul of the man. Now we understand the science, how the physicality of the man has engaged the soul of man, to the ethics and ethos of the Universe.

**This is why when the separation comes when we get old and gradually go through the process of dying, this cage, the electrical current which engages the soul of the man gets weaker and weaker.**

The soul knows it is time to go because 'I cannot be kept'. We have that cage and when we open the cage the bird flies. The cage of the man is made by the emotional part, which is of the same strength of physicality in the dimension of control through the blood of the man. When that circulation stops, when the physical heartbeat of the man stops, as in Tokamaks and in CERN, the electric current breaks down and the plasma is free.

"I always said the physicality of the man is a leech which has attached itself to the soul of the man, and now you understand. When the leech does not work anymore the cage is open and the only way that this can be kept is by the circulation of the blood of the man.

Now you understand that your blood is the cause of the engagement of the soul of the man.

Its circulation. To engage it, it has to make a very clear joint and connected work that it beats in the rhythm. The soul is aware as the man gets old, that 'I am getting free. The day of judgment is near'. This is why many people when they get old, they start putting their wrongs right because the soul is getting aware, 'I have to clean up the slate'. “

We have engaged the soul of the man. Through the energy which you transfer to the blood of man through the breathing, you can tune, strengthen or free the soul of the man. Even though you can keep the physicality going, you allow the condition.

As you remember the two magnets, by a strengthening one or the other, you can create the space, the separation; but knowing at all time that you are connected.

“You can let the soul free while you hold on to the physicality, as here I control. This is what happened to us at the time of sleep. The blood circulation drops, the cage becomes loose. 'You can go for a flight, like the bird and come back home when I'm here because I need it. Because with you I can exist.' “

The heartbeat of the man, the current flow within the motion of the physicality of the man through his blood is the key for the man to be able to hold on to the physicality or allow the soul of the man to encircle the physicality. Then you become light. Then you become messengers of your own soul. This is why we've said before: 'Man does not need any prophet.' Because now you become the Sun and through it, you shine to teach the others. You give, so the dimension of physicality comes within the dimension of the soul of the man.

Maybe now we understand what man has not understood for centuries, from the beginning of time – the totality of the existence. Now we reach a new point of maturity. Now, maybe, we can connect the dimension of physicality, the interaction of the soul of physicality, the interaction of the soul of the man, and the interaction of the heartbeat of the soul of the man, with the heartbeat of the physicality of the soul of the man; and understand more about our own emotion, our own feelings, our own intentions, now that we understand how we have engaged this beautiful bird. Even though, by its existence, you confirm our existence. If we learn how to work with it,

we do not need to kill to feed the physicality. Because this beautiful soul itself has made a line of interaction with the Universal energy. So through it, we can feed and through this, we can feed the physicality.

This is why it says: 'Thou shall not kill'. It is not just killing another man, it is not just killing somebody who talks, is not killing the totality. Because he has the gift, access to the totality of the energy of the Universe.

This might open your eyes to a new dimension.

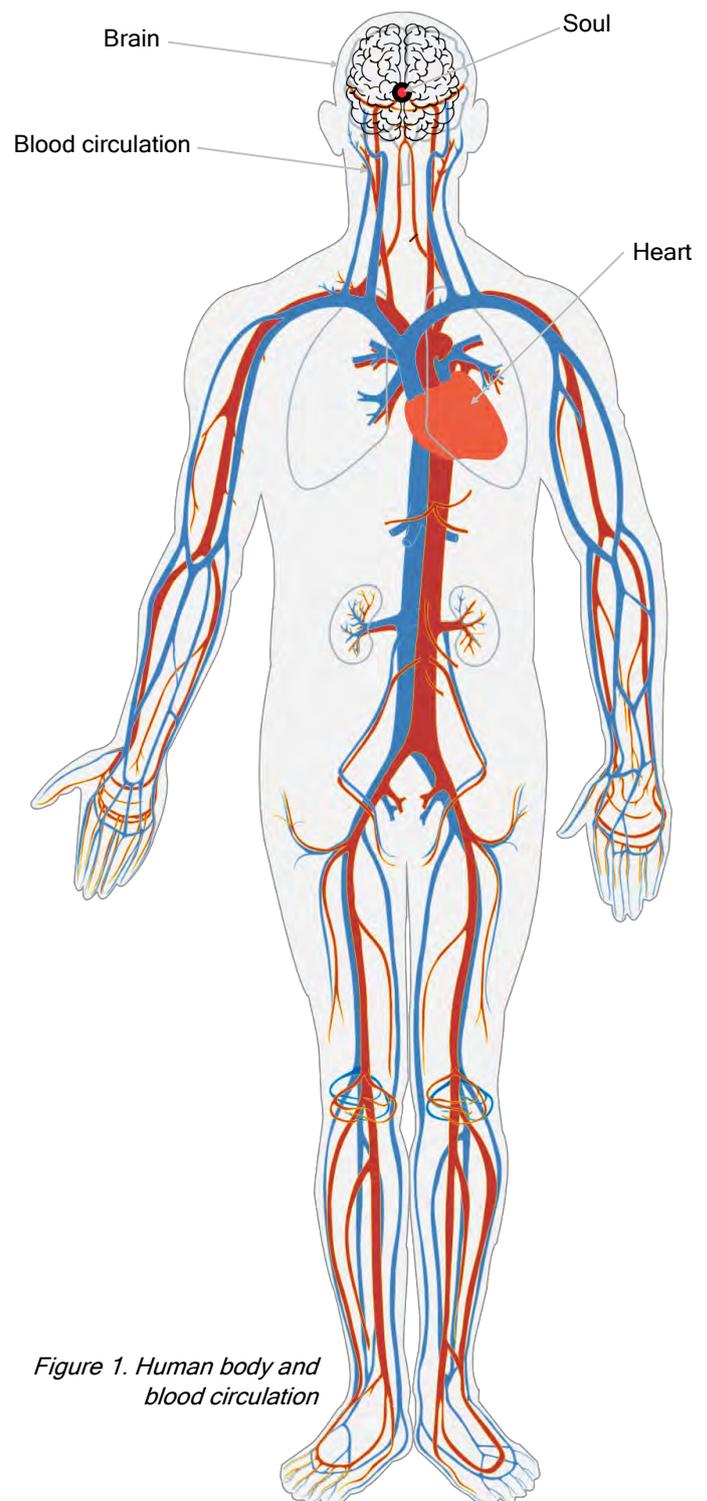

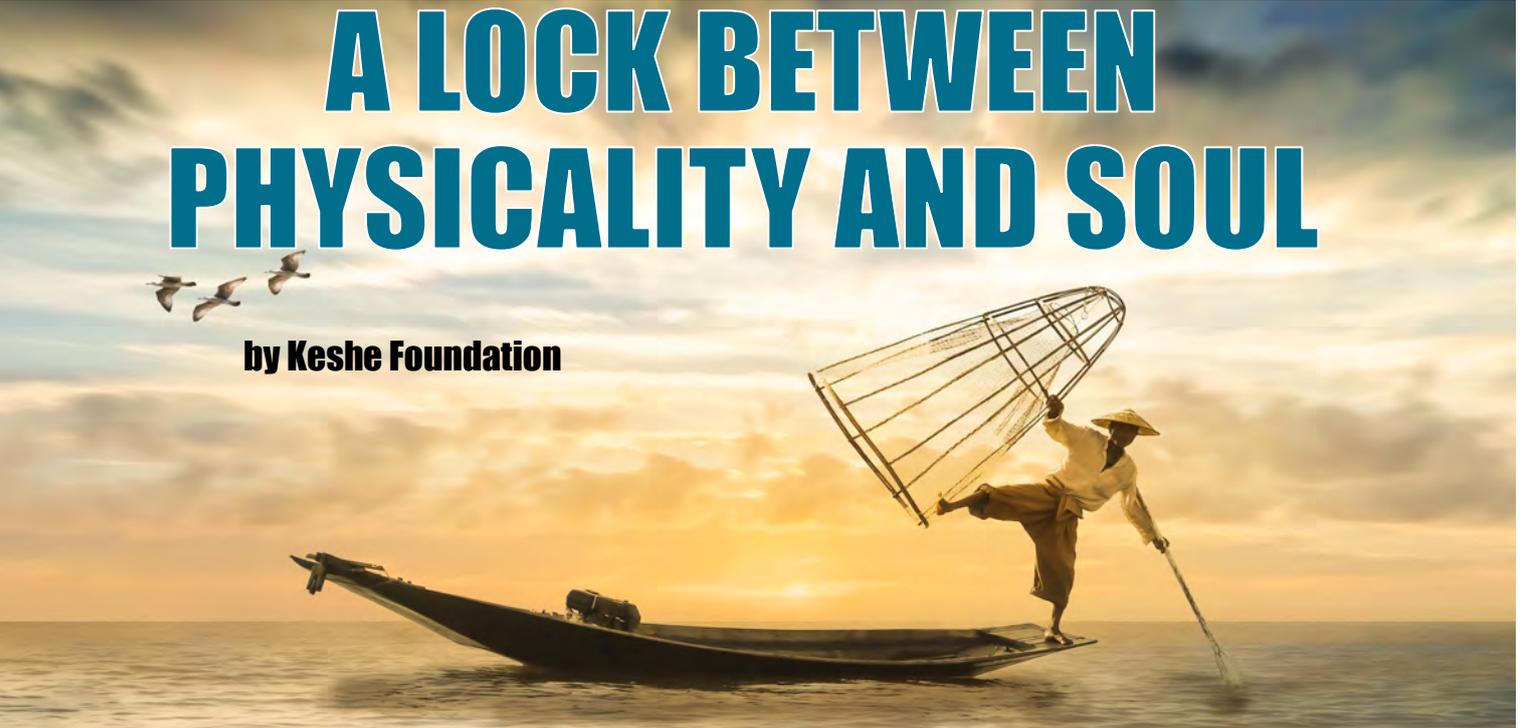

Figure 1. Human body and blood circulation

# CARBON-14: BALANCE CONNECTION A LOCK BETWEEN PHYSICALITY AND SOUL

by Keshe Foundation

The color of the brain of the man is a strange key to the color of the soul. When we look at the structure of the brain, we see a very white color, creamy white color, and in different points of the brain, it has slightly different creamy white color, given by the combination of Magnesium, Carbon, and Zinc. If you ever made a combination of the Magnesium, Zinc, and  $\text{CO}_2$  in GaNS, and you just change the ratio slightly, you get a perfect match with the structure of the physicality of the brain of the man, in this dimension. Has any of you ever made GaNS of Silica? What color is it?

$\text{CO}_2$  is white-creamy.  
Silica is white-creamy.  
Mr. COHN, protein is transparent.  
Zinc is white-creamy.

Isn't the brain of the man which holds the containment of the soul of the man a perfect match for the man to become a man of space? Is it this or can we consider, as many of us already made, the Calcium GaNS too? What color is the Calcium GaNS? White-creamy. And Calcium has as well an isotope Calcium-42, which is stable.

Have we found the joint and balance connection, between both - the containment and control of the physicality of the man, the containment and control of the soul of the man? Has our soul been traveling on a dimension of the physicality of the man and that

is why what we dream through our soul gets registered in the dimension of understanding and memory of the physicality of the man? The matter state of the physicality of the man is the Copper. Then its coating being of the same balance strength - the Nano-coating - creates superconductivity through the dimension of the soul of man.

Have we lived a double life? The life of physicality, superseded or super-covered by the dimension of the superconductivity on the level of one matter state, which is connected to the universal dimension. Our soul has already been built, developed, and has been from the beginning on the direction and in the presence of the soul of the totality of the Universe.

What is Nanomaterial?

Does not matter what, the space gap is the same. 14, 14, 14 - it does not matter what material you are.

"I spaced myself because I have a field, which can link up with you in double and triple."

If you have an atomic mass of 56 and you have another 14, it gives you 70. But, if you go up, one half of the weight of the atomic mass of Oxygen (70+8). Then you get the combination, gravitational field forces of this planet, which locks into it.

The other way if you add part of the magnetic field effect of four Oxygens, it is the same combination. You will end up somewhere around the Copper (64) and Zinc (65). If you take the combination

mass elements of Oxygen, which attracts and locks the man into the physicality of this Earth, that ties up the energy of the soul of the man to the physicality of this planet, which gravitational field, magnetic field forces of the gravitational field of this planet, we always said is Oxygen; you go four times 16. Then you see how Zinc has become part of the structure of physicality of the man.

Then we see through the Carbon-14 how the soul of the physicality of the man has got tangled into the gravitational field of the body of the man. Then, you can see how the soul of the physicality and the soul of the man have got locked into each other.

The next step from 56 is 64. We have the Zinc, connected to a magnetic field, the gravitational field of the Oxygen, which ties up with a gravitational-magnetic field element of non-ferrous but in GaNS state or plasma state of 64 of the Oxygen. If we add the 14 to it how does the whole structure locks into each other? Here, you bring the emotion dimension of the control.

The physicality of the man, the soul of the man, and the connection between the soul and the physicality conductivity, have locked into each other.

Why when we dream, we remember in the physical dimension and we remember what the mother said. It only happens in the dimension of the magnetic field of the soul and the common denominator of the 14. Now we understand why we remember everything from our dreams - because we bring it in, and we lock it into the physical dimension.

It is very easy to understand. Our man has got himself into the whole cycle of creation. The atmosphere

of this planet has just created the condition and the availability of the field forces. That is what has happened.

Combination of the Carbon-14 and a Carbon, in line of the connection with the physicality and everything else, has continuously played back and forth. If you add six or seven (half of the carbon itself), six to fourteen, you get twenty. What is twenty? If you add half of the weight of nitrogen to the nitrogen mass, which is seven, you get 21,22 - Sodium. Then you see how the structure has picked up. How man has got trapped into the physicality, just by accidentally having created the condition.

One to the physical dimension of this magnetic field of this planet, irrespective of its matter state, through its gaseous state, which is the Oxygen. One through the dimension of the matter state of this planet, which is through its Carbon. And one in the dimension of the strength of the work of the Universe – the communication or transportation line, which is Carbon-14.

**Man has always worked in all three dimensions.** Now we know why we remember our dreams. Why the color of the body, the soul of the man, is contained with the **white shade of the brain of the man.**

Everything else is matching up to fit in. Everything else is there sitting. Connection of the physicality, connection of the soul of the man, connection with the matter state which in a way is a compromise between the two, and the gravitational-magnetic field of this planet. Every half or a Carbon addition to Carbon-14 gives us a connection with our physical dimension.

Then we understand how both the magnetical with the gravitational field, hold on to, in a dimension of

the existence of the field of the plasma of the body, has led to the creation of the same connection with universal communication line and magnetic field.

One works in the dimension of physicality, one works in the dimension of the soul of the man, and one works in the dimension of the soul of the physicality. But the dimension of the soul of the man and the dimension of the physicality of the man sits in its dimension of the soul of the physicality, which is through the blood. That is how the link has been locked in. This is how the field moves from physicality dimension - the blood, the Copper, the Zinc.

We can see the structure. We can see how we can travel in the dimension of the physicality or we can travel in the dimension of the soul of the man. If we bring the inertia condition of the gravitational field of gaseous, which we are totally in the plasma condition, represented by Oxygen - then we have the manifestation of the containment of the physicality of the soul of the man; represented by Zinc, by the amino acid, by Silica, by Carbon-14, and Carbon.

It should be very easy for mankind to understand, why we even dream and why we remember our dream. It is actually its communication on the line of the soul. Some of us have enough influence on the transformation between the Carbon and Carbon-14, that we can even call it **the wish**, but in fact, we have understood how to tap into the soul of the man.

Now we understand when it was explained how we can control the space reactors with thoughts, with a wish - in whichever direction or dimension we want to go.

*262<sup>nd</sup> Knowledge Seekers Workshop,  
<https://youtu.be/VgNGpve4Haw?t=6691>*

Now maybe you understand why we even have a calcium skull. This is how they find Carbon-14 even in our bones. It comes from the universal field forces, not from the body of the man. It has got such a lapse, such a strength, that it is easy to travel. **It's a foreigner**, it's out of this world, but it is part of the common denominator, and has dictated the structure of the man. It is dynamic but has a beta-effect. It means, it interacts with the matter state. Calcium can block it, hold it, or contain it.

When you look at the brain of the man you understand about the soul of the man and the creation of the physicality of it. It creates a field force pull, that it becomes part of its cycle.

But its pull gets it, continuously extending on it, inside it grinds it, to get the strength that it needs for its existence.

That is how the surface of this planet or any other planet has decided. **The skull of the man is the same.**

It is the interaction gravitational-magnetic field of the soul in a different strength of itself, gives the dimension of the brain. With its atmosphere, it gives the skull of the man. Where it has lost it, has found a loophole, or leak on it - **it becomes the spine of the man**, then you get legs and arms. Then you get what you have to deal with, with the physical part of this planet.

Beautifully covers the soul of the man in it, through the dimension of physicality, but we call it a neuro system.

by Keshe Foundation

# CARBON-14: A FOREIGNER

## CREATOR OF THE STRUCTURE OF THE MAN

Man will understand how he has come to be created. This is your brain and your skull (Fig. 1).

You can see where you have a beautiful soul. You have to understand that it is dynamic. But it creates a gravitational-magnetic field force, which is equal, the same as you extracted CO<sub>2</sub> from the environment, very much it gives you, it pulls in and it creates your skull - Calcium - due to its forces (Fig. 1). But as the Calcium comes and sits, to find its position, like the crust of the Earth.

Very much like dynamic lava, it grinds on it, and it continuously feeds itself from it, that it falls in and it creates the seed of the physicality of the brain of the man.

We look at the physicality of the brain, but how come it has got that shape? There is a magnetic field flow wind - as you call it here. What strength it creates and it has dictated the shape of this wind. This is like when we give water to somebody, and we tell them: "This is water but it has GaNS. It is not normal water, it has a field around it." "Excuse me, sir, this is GaNS too, huh?" Your soul is contained within the structure of the GaNS, it has a wind around it too. It grinds to it, it releases field forces of it. Now you might understand a little bit more.

# HEART BEAT

PLASMA 101

by Keshe Foundation

# OF THE SOUL

We have started a new cycle of teaching. In this process of teaching we learn a lot and we teach a lot and it is part of the progressive understanding of the totality which we have set out to start some decades ago.

We are reaching the pivotal point of all the teachings, they are coming to the natural conclusion. In this process we have taught everything, from the matter state, to the plasma state and in the process of understanding more, we came to understand the process of working of a plasma condition which we call the soul of the man, the same as the soul of the planet. We hear the Stars, the planets, the human body and all the animals, they all have a heartbeat and that **heartbeat is the manifestation and confirmation of their life**, of their physical life, of the physicality.

And yet, **the soul of the man has a heartbeat** too. The soul of the man in his operation is no different than the soul of the structure of the solar star.

What is the purpose of this beat? What is this purpose of life? A life within the life which through its

manifestation leads to the confirmation of creation or a collection of the work of the fields together.

All the works of the Universe are exactly the same. It is just how you are positioned and how you position something, that it leads to that point.

In the life of man there is a problem between the two heartbeats. The heartbeat of the soul of the man and the heartbeat of the physicality of the man. The planet and the stars are usually having one heartbeat. In some cases, we find two. In some cases, the stars and their twin sisters collectively, in one heartbeat, responds to the other. This is how the strength of the fields of the stars tune to each other with the heartbeat of their souls.

It the same when the heartbeat of the physicality of the man tunes with the heartbeat of the soul of the man. When man understands this, man will come to one thing, which has been the prime objective of all the teachings which is **peace**. When the heartbeat of the man and the heartbeat of the soul of the man match they will work together. The physicality

of the man finds peace in any dimensions in the Universe. There is always the dimension of physicality for the confirmation of the existence of one towards the other. There is always a need to understand this. The reason why man has failed to conquer the space is because man has not understood the reality and the fact about the works of the Universe.

In the literature of the man, in the past times, you have spoken about the Adam and Eve. It was spoken about how Eve made Adam or how Adam made Eve.

One gave the existence of physicality and one through that existence confirmed the confirmation of the soul of the other. We always look what Adam gave but we do not look that what Adam gave was to confirm his own existence, his own love, to confirm the dimension of the physicality.

Otherwise it would have been the essence of the work of the Universe without dimension. If you look at it, the Creator wanted to confirm his own creation and his own existence, and the man was told this story but at that time man could not understand.

# PEACE

In the life of human race man has separated the two and this is why man cannot find peace within himself and within the society of the mankind. When mankind reaches the point that the totality of the soul of the man and totality of the soul of the Earth work in harmony as one heartbeat, then the physicality of the man will become part of and works the same. Then man shall find peace and then man will join the universal family.

This is very harsh for a lot of people to understand but in so many ways this will unravel itself in the coming time. Man will come to understand that it is him who is holding himself back from the knowledge of the Universe, from the peace of the Universe. Through this man finds the dilemma of justification of physicality in every means and dimension.

Today is knowledge seeking, it is **about seeking for peace and not seeking for the knowledge of making reactors for the space or making GANSES.**

Mankind will not be able to reach the ultimate goal unless man finds peace with himself, unless man finds peace with his own Creator. In so many ways man looks into creation of the God, but he was created from the interaction of the fields of his own star, and the star with his own galaxies and the dimension of the Universe.

How can we take man now to the dimension that without much effort man can enter the realm of the Universal Community through the peace with himself. In fact, it is the greed of mankind wanting more

which has stopped the man to become part of. Whatever you give the man is not enough because he always strives to have more; and in the process of having more he strives to kill other animals, other things, other people soul, just to have, to have to possess.

**“Detachment is the essence of existence and essence of peace.** Detachment not from the dimensions of life but the detachments from harming the others for you to survive.” The peace has to start within the physical structure of the man, within its soul, within the heartbeat of its soul and within the heartbeat of its physicality.

Man knows, but he never understood. We see through our physical life, we race with a heartbeat the young child and as we come to the time of reaching the point of achievement to tune with our soul, we reach the point of old age. The heart tunes to the heartbeat of the soul and at the point of the separation of the two, the two heartbeat beat as one. **This is the time.** Then the physicality of the man in its dimension of the soul separates from its structure and the soul of the man with the heartbeat of the physicality takes the flight of the freedom.

Many people cry, they want to achieve peace, but they do not understand the structure of the peace. “The reason I brought this teaching forward is because in one of the private teaching due to interaction of the soul of the man we released the knowledge which was not supposed to be released to the man. But after couple of

weeks of deliberation we have made a decision as in that teaching. We asked the teaching to be erased but the knowledge has already been shared with a number of the knowledge seekers. We share this knowledge in public today. If man understands this then man will enter through the gate of heaven.”

**The gate of heaven is finding peace and nothing else.**

In so many ways when the eye of the physicality opens into the eye of the Universe we do not need more than one eye to see the totality. The structure of the body of the man with two eyes is the elaboration of his physical work. One of the soul and one of the physicality. Man understands why he has to section his brain, why everything is in two pieces and why the totality of the two work together to create a dimension of the soul of man.

Then man will understand that the piece comes with the interaction of the physical soul of the man as part of the heartbeat of the man.

Why do we have that heartbeat right across the whole physical structure of the man. Because it is there through, unified.

**The heartbeat of a man is not just a noise. The heartbeat of the man is to homogenize all the strength of all the sub-souls of the man from every cell.**

Now that we have taken this path, mankind will mature into the dimension of the Universal Community. The dimensions for unification of the man does not come through the sword or

PEACE

through the blame, it will come through the peaceful actions of the nations that the soul of the totality elevates.

The time of the completion of all the teachings of past thousands of years has arrived; the time for it has already been planned out.

We have to unveil the truth, the reality and how we shall handle it. The whole operation of the work of the Keshe Foundation on the disguise of the knowledge was to create the condition for peace from mankind to walk into it by itself and not by lying to himself as it has entered.

“Not by the motion of the greed of the man to possess all but by the humbleness that I missed due to my own greed. Greed to kill, greed to possess, greed to be part of the totality when the totality has already been given to the man. Now you understand why many times I have said I am ashamed to be in the robe of the man. My knowledge is for mankind to achieve peace, but somehow my knowledge has become GANSES and Nano materials and sealing the soul of the others by attempt of possessing what you cannot possess, unless you are truthful to your own heartbeat of the soul and heartbeat of the physicality.”

World peace will only come when man understand the totality of his own existence, the totality of the heartbeat of the physicality and the heartbeat of the soul of the man and its connection to the heartbeat of the soul of the Universal Community. If you understood in a simple language, as your heartbeat tunes up with a

heartbeat of the soul of the man, then the same has to be tuned to the heart of the soul of the Universal Community, as none have physical dimension. Lying to the dimension of physicality would not lie to the soul of the man.

It does not matter how you dress up, the axis to the soul the Universal Community, all open shall be seen.

We are not looking for man to answer and change ways. We are looking for the man to understand, to comprehend and set up new ways.

Creating the condition of peace for the soul of the man through the existence of the soul of physicality, that the two heartbeat work together in harmony. That through it man finds access to Universal Community.

“To join the Universal Community you do not need to take yourself to the space of above Earth, above the solar system. What man has to understand is that he himself is part of Universal Community. He himself is part of this structure. He is already in the space. Why is the man looking to get into space? The Earth is part of the Universal Community so is the soul of the man. But man has in a way embedded himself, entangled himself into trying to get what he already has and he has blinded himself into it.” Now. How do we progress, how do we achieve peace? We have always retaliated, and we answer back to justify where the wisdom comes from, understanding and in a way working towards the final goal - to find peace with our souls.

Justification does not come by retaliation. Justification does not come by trying to answer to be there. Peace comes when one understands the totality.

Find peace between the operation of this heartbeat of the physicality of the man and the heartbeat of the soul of the man. As we have seen when we put two reactors together and when their fields interact like gravitational field and magnetic field, they will spread and create the new dimension of sphere of fields. For the body it is the same. The heartbeat of the physicality of the man in conjunction and interaction with the heartbeat of the soul of the man will bring unanimity, collaboration, cooperation, tuning into the soul of the Universal Community.

“I have not come here to create another religion, another prophet, and other rules and other groups. I have come here to bring man into Universal Community. You do not need a plane, a jumbo jet, a spaceship or a donkey. But you have to find and understand the operation of the soul of the physicality of the man and his existence within and with the heartbeat of the soul of the man. The eye of the man is the vision of the Universal Community. But man has chosen to decipher only what he sees in the dimension of the physicality. What would be the future for mankind as of today? Mankind as a whole has to work. Find the dimension and the strength of the heartbeat of the soul of the man and the heartbeat of the soul of the physicality of the man and as all the mankind and all existence on this planet are

PEACE

tuned to the strength of the amino acid, so the totality of the creation on this planet will find peace and harmony. At that point man will reach peace. Peace within his own physicality. Peace between the soul of the man and the physicality of the man which will diminish all illnesses at one instance and then the balance between the heartbeat of the soul of the man with the heartbeat of the soul of Universal Community. Then man does not need ever to leave this planet as the dimension of the soul of Universal Community will take man to see the whole of the Universe, even the soul of the Creator.“

We are not teaching you religious teaching, we are teaching what you have missed in reality in the structure of your own life.

Four years ago, in Desenzano we had a man but even he did not know how he feeds himself for 21 days. He energizes the soul that through the soul, through the harmony and shortening the breath, breathing and tuning the soul of the physicality to the soul of the man, he feeds through the soul of physicality the physical structure of the man through the heartbeat of the man. As the heartbeat of the soul of the man is tuned with the heartbeat of physicality, it gives the essence of existence to every soul within every cell of the body of the man.

We fight for homes, lands, cars, clothing. When will we fight for the freedom of the Universe to find peace within yourself?

Man needs to mature then man will find peace.

“The only wall and only cage of the man shall be the comprehension and understanding of the man, of the work of his soul, of his heart, his physicality and the soul, the heartbeat of the soul of his existence. Then you decide. The span of the Universe or the cage of the skull of the man and within each man has to find peace within itself and within the Universe.

**You want to see magic, find the heartbeat of your soul and find the heartbeat of your physicality soul. And then you will see the magic. The Universe will be your oyster, let alone the Unicors. “**

In the Universe there are no supermarkets and there are no churches to reverse the dimension of punishment of the soul of man in not understanding the elevation of the soul of the man itself. There is no punishment except creating distance to understanding of the work of the Universe.

We see how abusive behavior changes the scale but mankind will come very mature to it very soon. We impose sanctions on those nations who impose theft and robbery as part of their structure under disguise of the peace. Sanctions by the soul of their own nations so not by no other nation. The same goes for mankind. The soul of mankind is responsible for the total souls of the creatures of this planet. “Today is promise day because now we have fulfilled the promise that you understand the totality. “

If the planet heartbeat is up, is the soul of the man in that position? Has he got the position to use it to elevate his own soul?

With this increase we find elevation of the soul of the physicality to become in harmony with the heartbeat of the soul of the man?

This planet is not just rock and sand and the waters and the air... this planet is a living entity. It has, it understands the feeling of we are part of it. The Universal Community is part of the same. we extend the limitation to Universe and the structure of Universal Community, then human body.

We hear our heartbeats because we bring the dimension of the physicality of the skull of the man to the strength of the ear of the man or does it become so loud that is heard by the ear? There are different reasons why we hear our own heartbeat. The soul of the man is the same as the star, the Sun. Now that we have scientists and other people they tell us that the Sun has a heartbeat and the Earth has a heartbeat, so has the soul of the man.

“Man never considered it. From today he has to. Because that heartbeat, with the soul of the Creator and the soul of the man leads to creation of the interaction of the souls, leads to the creation of the soul of the man.”

We said the creation of the soul of the Creator and the creation of the soul of the planet leads to the creation of the soul of the Man.

As the physicality of the man was connected the dimension of the matter state of man, now the soul of the man through this dimension becomes connected to the soul of the Universe. The biggest riddle in the life of the creation of the man is solved.

PEACE

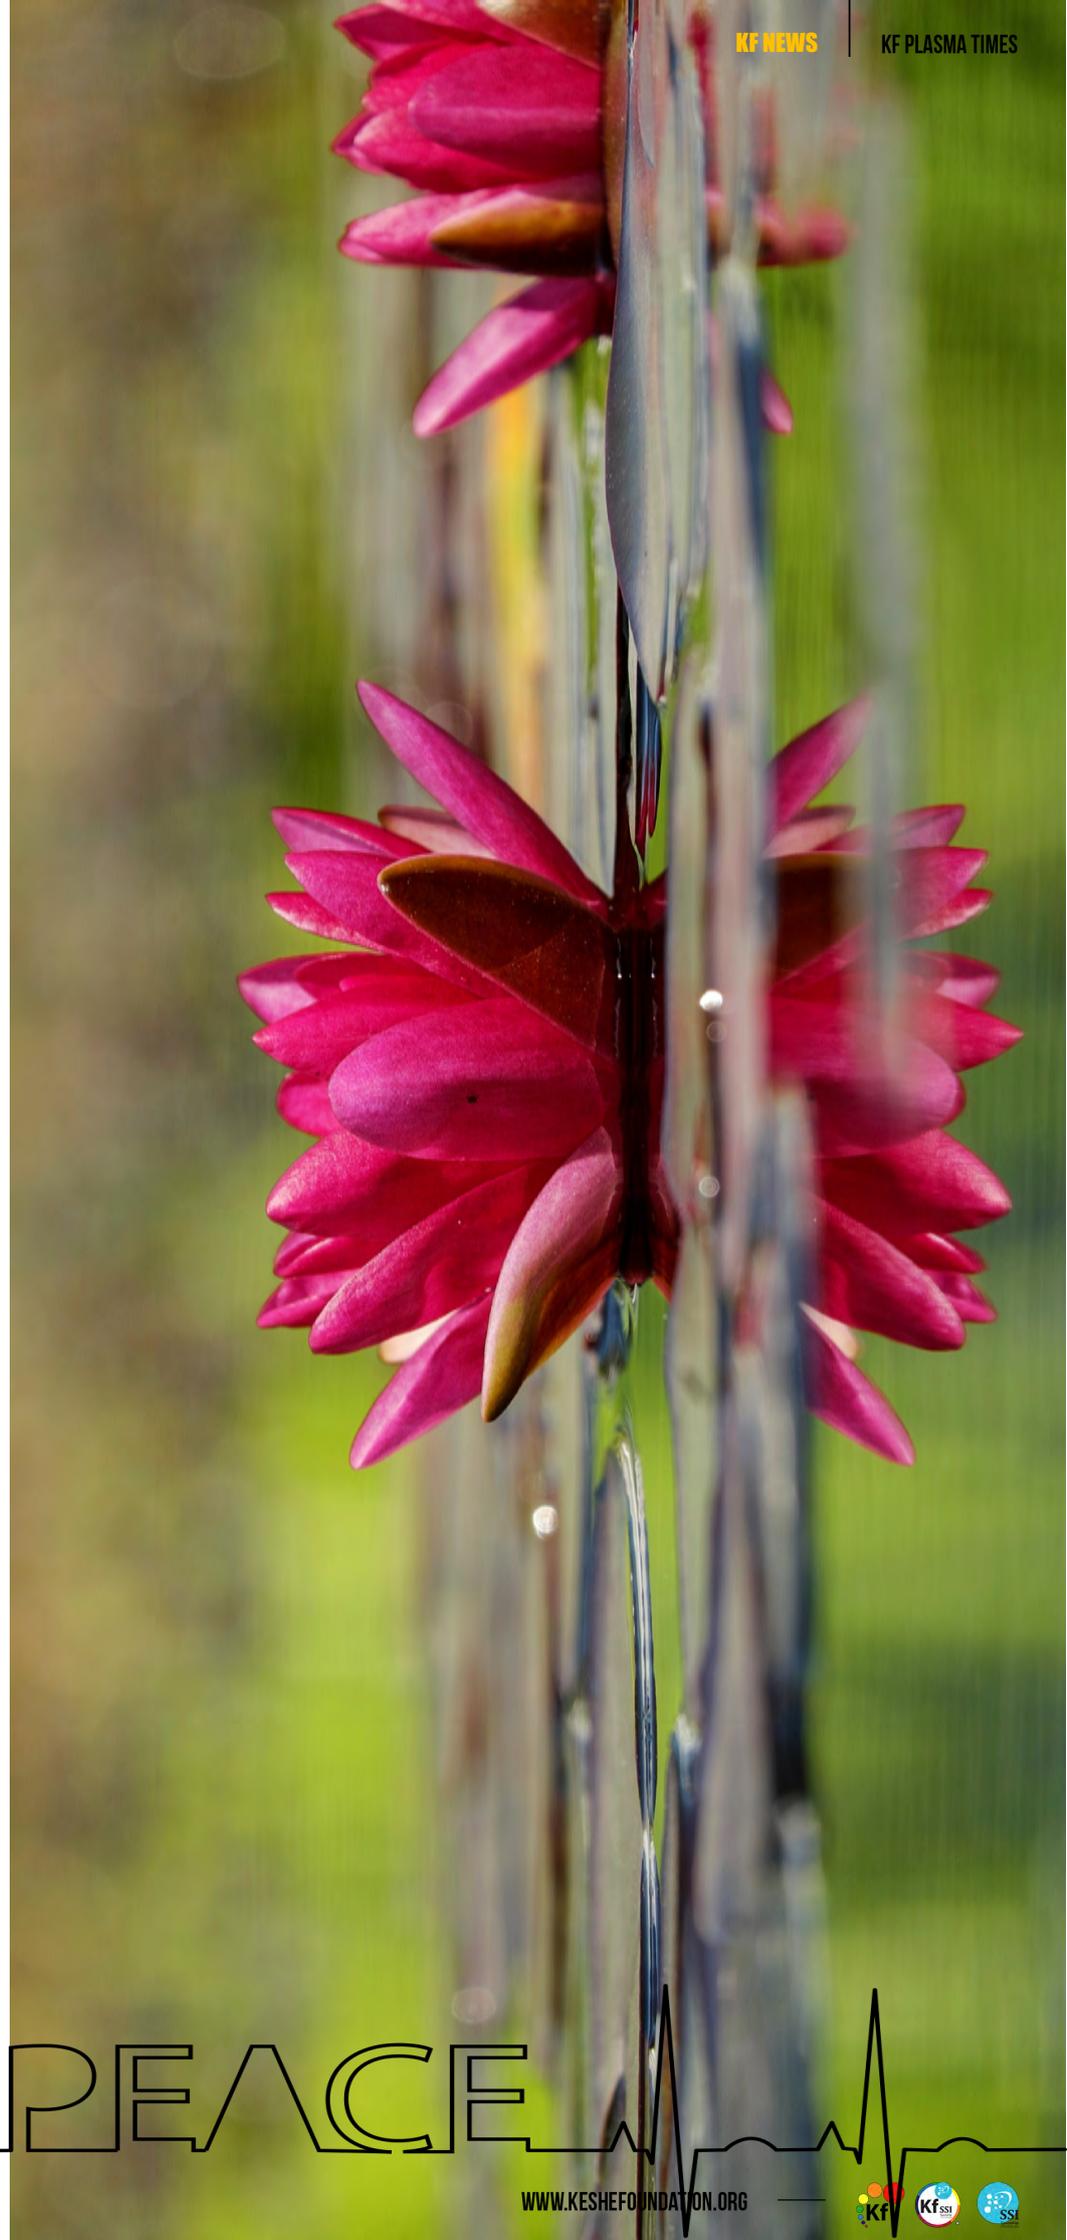

“It is now for the man to find out. And I bet somebody is going to make a reactor and says this is the soul of our reactor.”

This is for mankind to mature into and understand that its self-exile through lack of his understanding to be part of Universal Community is over. Some will mature into it and some still claim that is something wrong because this way they can still argue their position. Just to confirm their existence and nothing else. But they exist even if they don't see it. **“They are loved but they refuse the love of the Creator. That’s their problem.”**

We have given man the freedom of the Universe. The day of judgment, and that judgment is between the soul of physicality of the man and the soul of the man. We can build all the spaceships in the Universe, but in reality, it is us who have to choose the shape of the ship or to understand the truth about the ship.

“I hope mankind moves to the point of final maturity. I hope mankind finds peace between the soul of its physicality and the soul of itself that through it, it becomes a shining star for those souls who carry the same strength and heart-beat as the soul of the man, that mature strength.”

PEACE

# MINING REVOLUTION: NEW WAY OF MATERIAL CREATION

by Keshe Foundation

This will become very effectively used by those who want to travel into deep space, into a specific direction. Then they can decide where inside that planet they want to appear, where they want to be, no matter if they want to be in the water, they want to be outside, they want to be in the atmosphere.

This will bring a new dimension in the world of mining on this planet because if we can match and understand magnetic field of the Earth in the three dimension and understanding the magnetic field of it we do not need to do what we do, excavating mines and drilling holes to go to the mines.

The process of mining or extracting material in the universe is totally different than what we do nowadays.

We have the Earth and we just drill a hole. We go in and see what we can find. Or we take part of the planet off and we extract to see what we get. In understanding the work of the universe and understanding the potential of the technology which is in the hand of the man these things will change drastically.

Mining the way we do it is obsolete because in this process we do not need to dig out things. We understand the field strength, we understand the process, we go into what is known as removing any material you would like but using the structure of the planet. It does not matter what it is because you will understand in the scale of the order of magnitude. Once the knowledge of man reaches such a level then everything can be done.

How it is excavated, how do we get materials in the space? It is very simple.

When one uses the body of the man to put a system on one side of the body (Fig 1 A) and then a system on the other side (Fig 1 B), one can transfer the energy of a condition out of the body of the man.

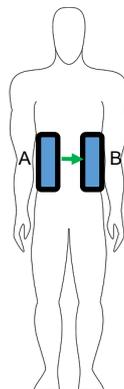

Figure 1. A, B-plasmatic systems

What it does, you feel it moving from one to another, you empty by energy gradient.

This is the same process that the man will choose to extract. We decide what we want to extract at what length, at what the strength. We transfer the energy of the material out. In a way this has been done in couple of occasions and we have seen it even in the medical applications. This will change a lot of things for a lot of knowledge seekers and the mining structure of what we need to have to understand. A new method of extraction (Fig. 2 A & B systems) will take over. In the space you do the same. Here (Fig 2 C) you have a matter state.

If you want to extract the energy of a certain field for what you need that you create a condition that whatever magnetic field in this environment you want, you can transfer one to another and collect at the end (Fig 2 D) what you have from the position. The difference is that this position is your spaceship. (Fig 2 E) This position (Fig 2 F) is the point which you made of a higher order using gravitational magnetic fields to extract what the fields you need into yourself.

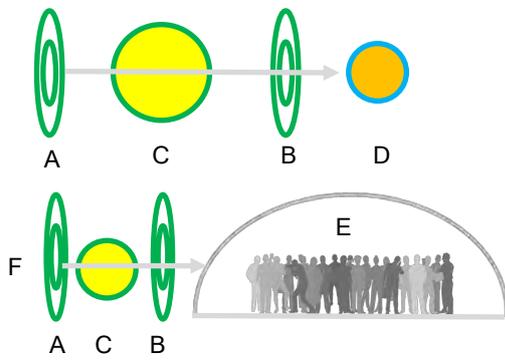

Figure 2

This kind of knowledge, these kinds of technologies are part of what we will see emerging in the coming time. We have to understand these cycle of work and in that process we will come to understand about the work of the systems, about the science we are getting involved with in a plasma space technology. We map up the plasma fields of the universe, also called plasma vacuum systems. You extract. In so many ways, even at the present-day mining you will understand it is much easier to do. This has been tested and it is amazing how it works. It is so effective.

We are going back to the same as you talked about the structure of the body of the man the way we extract, all we do, we take the planet and we find gold here (Fig 3 A) at 10 meters, 5 meters, or 100 meters below. What we do is we insert within this structure a system core, system simple core. We go through this and we leave our system here (Fig 3 B), just below for the mining level.

We estimate that at this point there is no more of gold. You create a field of the gold and you place a system here (Fig 3 C). In a way you transfer the whole gold without any digging directly outside.

These are the technologies which need to be expanded by the Keshe Foundation followers and those who follow this technology.

There is no need to extract, there is no need to dig, to drill. This kind of technology will change the course of a lot of things for humanity. Damages like to

Amazon forests for finding new materials does not need to be. Now we drill a hole for all extraction. These kind of drills with a powerful system underneath tuned to gravitational-magnetic field of the element, the extraction is simple. The translation of the knowledge will become very important. Those of you who work in these kinds of fields, those of you or the future engineers which will work in this environment will understand now we start showing the application of the technology. And its implications.

In setting up new research centers, new developments, these making of the GANS machine and systems of Magravs units are not really the true applications of the technology.

Things like this, development of new mining technology, understanding the plasma technology even in the space. You look at what is in there inside the planet Earth. If you understand what is and how we create this magnetosphere of this planet we can do the same. If you put a powerful satellite above certain limit and just create a field source weaker of the order of, just as we said, the gold the space of this planet continuously produces gold through the interaction of the field of the Earth and the Sun. We do not need to extract material from inside the planet where these materials came originally from outside as they are created from magnetic fields.

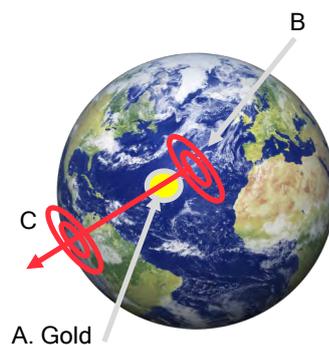

Figure 3

This gives what we call national material security. Nations like Western world that extract so much from Africa or South America, with understanding the new technology will change the course of the whole production of materials.

We have to understand the new space technology gives us a different opportunity, different dimension. It gives us a totality of understanding the real work of the plasma technology, the real way that we work.

The totality of understanding this kind of knowledge translation of the technology is so important and it is so radical that we have no choice, literally have no choice, but to start developing new ways, new understandings, new processes.

There are 20 thousand different ways that this technology can be applied for new products. These things will open new horizon in the work of all of us, in the work of new industries, new technologies, new parameters, in the totality of the understanding of the systems, in opening a new dimension in many aspects of life.

If you think of it Tesla did this some years ago but we only looked at the energy transfer of the work of Tesla. If you extend the knowledge in the work of the understanding of the strength of the matter condition that now we have managed to convert the matter into its plasma, capturing materials from the space of the universe in their magnetic field strength and converting them to the matter state of what we need at a given strength it becomes very easy.

Peter some year, two years ago showed us how he could create conditions to create matter. This in a way is Earth gravitational magnetic fields dictate what field we can absorb and collect.

# Zero-time Communication

by Keshe Foundation

It comes to the point that we think do we need to go through all this, the rigmarole which we are going through it now just to survive daily life? Would some of us become more adventurous and start laying new ways for mankind or at least for some of the mankind, to find new business to be busy that they can do something? Would this bring a new intellect in?

Would this bring a condition that we can interact? Can we communicate? We can find a space position that what is needed to be completed in nonverbal communication or being able to interact with other parties that you can amplify your thoughts. To be able to span the universe with the same kind of communication system.

One of the most advanced communication systems we know of with us is what is electronically available today. We call them satellites. We call them in many ways, but they still need digital electronic system to decipher that it can be understood. This brings a lot of problems for mankind. You are going through chips and chips and you are going through the speed of sound or you go through all other things.

But does not solve what we call the zero-time communication. What is the next level of the human race regarding the line of communication? How do we come to be able to produce systems that can transfer information across in the spans of universe, using and understanding the flows, the information across the universe?

We rely on many things, but the new space of understanding, the new methods of understanding

the line of communication, in line of horizon is what we can do, what we can spare, what we can achieve.

How do we create the new cycle of communication systems? Without a communication system, man becomes isolated in depth of the space.

Then we get worried; "What is my son up to? What has happened to the dog? Is everything safe?" We cannot wait for three hours, one year, for the voice to get to us from the other side of this line, the other side of the universe.

In the teaching understanding the creation of gravitational magnetic field system, we have realized these systems are natural communication system. Inherently, they send out, and inherently they receive back.

As we have seen with the star formations, as we have seen with all the galaxies, as we have seen with everything else in the universe, we have to understand what is the strength of going and what is the strength of coming back? We are sending a message out, maybe it is received, but how do we get the message back?

Are we, as we say, in the matter of state, speaking on the same frequency? Or is it a one-way communication? What are the new tools of communication using the plasma technology, which gives man zero time? How do we develop these technologies? How do we take the new understandings of the work of the plasma into practicality to be of use for the mankind?

At the moment, if you are in Washington and you are listening to somebody broadcasting live in Tehran, you see the mouth moving but one has to wait until the voice is heard, before one can answer. This is halfway across this planet. What are we going to do in the distance space of the universe?

What facilities, what technology we need to develop that does not matter wherever out in the universe we are, and what kind of obstacles on the path, we can still send the message home? And to also get this message back. That no noise or obstacle in the universe can become barriers.

If we understand the totality of the knowledge of the magnetic field spectrum, then we can tune into a specific line, a specific strength, a specific MAGRAV field transportation, which gives information at what speed, at what strength.

Then when I tell you I am at 15 Tesla, for example, 0.5 in the magnetical, and 4.3 gravitational, wherever in the universe you tune to that, you can listen.

But do we have Tesla measuring systems in the universe? Do we have systems that can be fixed continuously, does not matter where we are, to transmit the whole noise, the whole voice, the school of thoughts and the soul? That anybody in the universe can tune to it.

Like the initial systems, which we discussed, we can find new ways. We can find new methods. We can find the direction of the flow that allows us to bring a new understanding and a new technology in communication.

How do we develop these technologies? How much have we understood the full knowledge, that now we will step up to the next level?

In fact, if you look at all the teachings of nearly past year and past years, the communication systems has been sitting right in front of us. Because we never considered, we have ignored it, or we didn't ignore it but if it is not there, we do not see it.

We use it in material production system. We use it in every aspects of this technology in the dynamic system. To be able to understand and be able to reach the understanding of the others, we always said, the system will take in any direction as it needs to.

At the same time, the same system takes what it needs to. Now we can see there is a common denominator. We know this system. The system exists within the body of the man. We have the soul of the man.

Then we have the soul of the physicality of the man which sits around the heart of the man. At the same time, we have the physicality of the man.

Every cell of the physicality has its own soul, which interacts with the soul of the man. It does not matter where you are. Even though they have a connection through the dimension of the soul of the man to every other part of the body of the man.

Your soul transfers its energy or the information to the heart. Sorry, the other guy standing next to you does not get that information to his soul of his heart, does it? What you feel emotionally in your brain in reaction, in respect to the attitude of your heart and the dimension of physicality does not give cancer to your wife or to your children.

So we can see the zero time communication, in a specific direction, is already being part of the life of the man. The only thing is to move the soul here, and move the soul of the heart of the man there.

Or in a simple way, find the strength that these two communicate. It does not matter where you take the body of the man you still have access to the soul of the man.

And at the same time as you have created the common denominator with the soul of the others, like your mother or father, your heart, does not matter where you are.

You have an instant communication. Then this brings man to a new understanding. This brings man to find out about the strength of the soul of himself that through it you can communicate with the other souls.

We know this technology. It is embedded in us at the point of inception of the man, within the womb of the mother. Is one of the first gifts given to mankind by the carrier, which is the mother, the soul of the mother. She talks to us through the emotion of the soul, where she is the capture by the noise, by the soul of the infant. This is the way it has been embedded within the soul of the man.

As those who we endeavor to enter space there are no dictionaries in the universe. In the physical world, when we want to ask for something and we do not know the language, we are crippled.

"We make all sorts of shapes and noises to tell what we need. Have you ever tried to ask for an egg when you are in China and you only speak English? You make the noise of the chicken and every other shape, where it comes from, to lay an egg."

How do we communicate with men of universe, who do not even know what an egg is, let alone the bird. But as we understand, they will understand. "This is the animal we have on Earth. It flies. It lays an egg, and we eat the egg and the rest of it."

We have no language, we transmute by the strength of the soul of the man.

Is mankind ready to dig deeper, not in what we call physicality of the man, but dig deeper in understanding the operation of his own soul? Are we ready to open what we call the RNA of the soul of the man; the recordings which sit within the soul of the man are not only when we make noise. So why are we making these noises for?

There must be a memory of the chicken inside the soul that explains the chicken. We do that in our dreams. When you tell "to your mom; "Mom would you like some chicken?" And she says; "What a beautiful cooking." There is no chicken and there is no cooking. But she knows, and you see the chicken and she gives you a chicken, or you give her a cup."

How do we create the images which to us are real, and to the receiver it responds accordingly? There is no physicality of the man, and there is no eye to see. We see through the eye of the soul of the man.

Is vision the only tool of understanding the environment of the man? Or do we become like the other animals that we have a sonar to our soul, that we manifest the images according to what we receive and the strength of the receiving it?

The next step of development of the space technology brings one of the first needs of the man. It is not just flying and it is not just getting into the spaceship. That is the easy part. Our problem was going up and down, but the next problem is how do we communicate? How do we even communicate with the soul of our own physicality, when the dimensions of the fields of the universe are different?

When we get a pressure or emotion, we feel strength and pressure on the heart. What is going to happen when the man goes in the depth of the fields of the universe, how much pressure would be felt? Would the heart move to the top, or would the heart move to the bottom? Would the heart, suddenly through the fields of the emotion of the soul release so much energy that it damages the physical brain, like getting a stroke and becoming paralyzed? These are the conditions that mankind has to enter.

Mankind has to understand before becoming passenger of the universe. Flying in the spaceship will become a prison for the man if he does not know how to get out of it, to get inside it, to be able to communicate. Even in the depth of the universe, in

time of need, to be able, through the soul of the man, to be in touch with his own creator's soul.

"The last week's teaching [270<sup>th</sup> Knowledge Seekers Workshop], I deliberately brought this subject up. As one asked, we have a common denominator to the creator. This is the essence of the creation. In Now we understand the theory. Now we understand the totality, if we can become strong enough to be able to travel in the school of understanding, to the depth of strength of our soul. But as we said last week, we have different passengers aboard this ship of this planet. Those who would like to go with a bicycle, those who will like to go with a spaceship, those who like to travel with the soul of the man."

How do we communicate without waiting for a year for the message to come back? We need to go within the depth of our own soul to find the answer.

"I can teach many, but if you have not experienced it, how can you see the beauty of it?"

When travelling with the spaceship we need a physical communication system. When travelling with a bicycle we need a little bit more labor-intensive systems. But when we travel with the soul of the man then we become true passengers of the universe, we can then travel anywhere because we can communicate.

With the new understanding of the work of the soul of the man, there are no fighter planes and no aircraft carriers. It all has to fly on the ship of the universe, magnetic fields in the universal ocean, in the depth of it; and the ship and the water are made of the same. There is no separation between the carrier and what is carried on.

At this moment of time, we have a phone that we have to send something through it to another point. We have a ship, we need the waters to sail on it. With understanding of the work of the soul of the man, everything is one. We can make systems to be part of the communication line, but in fact, the system is the communication line.

This is the difference between the mechanical system and an actual space system. You do not need anything at all than what you think is itself, the carrier and the totality. It is a zero space and time.

"Those of you who understand the true meaning of this, will move on to elevate your souls and move on to become the true passengers of the universe.

Then you understand you can transfer your own soul across the strength of the fields of the universe, and then convert those souls to physicality of the presentation at the point of arrival.”

We need to understand the process of transportation, transmutation, and at the same time, zero time, zero space, existence of the soul of the man. Then the question comes, does my soul exist in that point of space and time?

Those of us who manage to master these, to know that it is a zero time and space, we can manifest ourselves at the same time in the eye of the physicality in many spaces. The eye of physicality is at the lower strength where the speed of the soul of the man and the strength of the zero time and space can manifest itself in many places. The slow frame is the eye of the man but, the soul of the man plays in the fast frame.

This needs mastering the presence. This is in many cases achieved by those who go through a deep pain, meaning they receive so much and they give what they have.

We see these at the point of separation of the soul of the man and the physicality of the man. If the man reaches the point of understanding of his own creation, he does not need to go through the point of separation, but he can create the point of manifestation from the same process.

“If you understood, you have become a blessed soul.” As we move away from the dimension of physicality, the physicality of the man shall not do any wrong. The soul of the man is the feeder of the physicality of the man which satisfies its need, be it love, be it hunger, be it everything else that that soul needs.

We have to decide; "Am I traveling, I want to be with friends and joy, in the dimension of physicality, or do I travel with the soul of the friends, in the dimension of zero time, in the spans of the universe?" Amazing to know how little we know, about our own creation.

Do we need to develop technologies to be able to communicate or do we develop the understanding of the soul of the man? Both is the freedom of the choice of the man. Or do we decide to be on one or the other? Then there is a very interesting point for those of us who watch too many movies in the realm of the space.

“If you have managed to educate yourself to understand the operation of the zero time and you can move, then comes one question. Do you need any doorways to walk off the spaceship? Or do the spaceships of the true men of universe, have no doors? As you can transmute your own soul to the dimension of the existence.”

Does the soul of the creator have a space and time or the confirmation of the existence of the soul of the man, gives an indication of the totality of the creation of the creator, in no time and no space?

“I wonder if mankind would have understood this so simply if mankind was not building the space reactors, with the motors?”

Then the dimension of understanding comes, now that we have moved into the dimension of what we call dynamic systems, with no motors. Would this allow us to create the exact dimensions of the soul of the man within these new systems? Where, in fact, through the systems we develop, in understanding the process, we create new communication systems for the soul of the man and the rest of the universe.

When using a plasmatic system, do you actually move the physicality or do you increase and elevate the soul of the physicality? Do you enhance the soul of the man or do you actually interact by elevating the soul of the man, so of the physicality?

“Going into space is not just understanding the lifting and having a box to call yourself: "Now I'm in a smaller house, I will call it a spaceship, where I have moved in out of the Earth-ship, that I was traveling with it.”

We need to understand more.

# UNIVERSAL COUNCIL COMMITMENT

In the teaching of last week, [270th Knowledge Seekers Workshop] we spoke about the common denominator that is within the soul of the man, which is within the soul of the Creator. How do we tune to the specific? And we do not always want to speak to one, we want to speak to the collective of souls together.

There is a party. You just don't want to talk to anyone. You want to say; "Everybody, there is a birthday party!" or "We are going to blow the candles." How do you let everyone know, how do you choose?

This is the process that will be unique, it will be developed, understood, and become operational by the members of the Universal Council and the Earth Council.

They are present as a soul present on this planet and as a soul to those of the Earth's siblings, who travel the space of the universe. It is a commitment, a common denominator with the strength of the soul of mankind.

This is why we do not choose the members of the Universal Council. We let their souls to step up, as they have matured to that step to become the reacher of all those who understand, in emotion of the spoken language, or the emotion of the language of the man.

This is the reason why the members of the Universal Council are chosen by their own soul, and not by the man.

When you step up to become a member of the Universal Council where you judge by your soul, you have managed to enter, to understand, that point of communication with the rest of the souls of the common language.

To speak a language we trigger specific strength within the soul of physicality of the brain of the man, which touches the emotion of the man. At the same time, if you are a member of the Universal Council in English, and you have no access, you cannot reach, let's say the Persian speaking language member of Universal Council, he or she can hear you.

When you are at the beach and you shout in English, not only the Englishmen hear. Everybody else on the beach hears your voice. This is the next step in the development of understanding that side of the communication, the Universal language side of the communication.

Then you step up as members of Universal Council, as members of the Earth Council, and, in deeper time, when the man becomes pure in the work of his physicality that he becomes as close as to be a universal person, then you start hearing the voice of the soul, of the other creatures of the universe. In a way it is the elevation of the soul of the man.

This is the stage where we elevate the soul of those who become the true members of the Universal Council. The station of

the Earth members of the Council, in that line, will be in that dimension, they carry both of both directions. Now you understand why we chose the way we did, members of the board councils.

In this process, we are opening your eyes to the next entry, that once you enter the Universal Community you are not bunch of dumb and deaf people. You can communicate, not with a sign language that no one understands, but through the language of the soul of the man.

“Which way do you want to travel? Would you like to go first class or would you like to be on a business class? Or we are happy to be economical? Or do we create a new class, we call them, space class?”

Then you have learned the language of the space. You become the language spoken, that like anybody else, you can translate the strength of soul to the understanding of the interaction of the physicality of the soul of the man.

Mankind has to take the strength and option on its own understanding of its own soul.

In that process, as we said, as Universal Councils we can reach the strength and the span of this universe. The Earth Council will reach the leaders of this planet.

Talking to the world leaders, is not and should not be in the verb

and voice by the members of the Earth Council. It should be direct through the soul of the world leaders. This is the gift which has been given to them.

The members of the Universal Council have access to the physicality of the man of leadership, and through that, they can influence the condition of the transformation through the soul of the man. There is a big difference between the two.

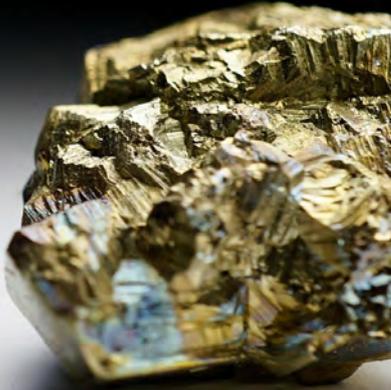

Those of you who have reached that point, you understand if you can or you become, or you can stand to become a member of the Universal Council.

We chose the member of the Earth Council. Those of you who are the member of Universal Council, you understood the need of the soul of the creation of the man. And in response, you answered.

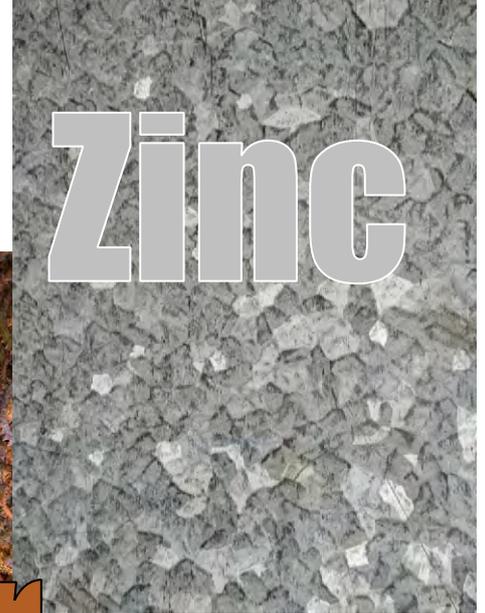

In the same direction, very soon, many of you will step down because you understand the true meaning of servitude by soul, is different than the servitude by the physicality.

# Iron

# Zinc

Question: (Azar) You made three boxes, one was Copper, one was Iron, and another box. The Copper was the muscle, the Iron is in the blood, which we can say the heart pump. And then we come to another picture which you made the soul of the creator and then the soul of the Earth, because the field, as they are interacting magnetical, gravitational, and as they lose the energy in combination with the salt of the planet, they give to the amino acid, which is us, we get created.

Now, if you take those three boxes, the Copper and the Iron, bring it to that picture, can you make the connection there?

Answer: (Mehran T. Keshe) You should have understood very easily. The interaction behind the fields, if you look at it, you have the Iron, you have the Copper, you have the Zinc.

Somewhere here (Fig. 1A) there is an element which is a cornerstone of the creation between the physicality of the man and the soul of the man. It is a crossing point. Man has no physicality until it reaches this point.

Our physical dimension comes from this and from the interaction of these, we are manifested in the dimension of physicality. That is what you have to understand.

You have Carbon, Nitrogen, and Oxygen – 12, 14, and 16 (Fig. 2A). You have here (Fig. 2B) something called Sodium. You have somewhere here, Potassium, Calcium, and the rest of it, which is around 40 (Fig. 2C). Then you have another bracket which is around 60, where you have Iron, you have Copper, and you have Zinc (Fig. 2D).

The physicality of the man in a dimension of existence of a protein manifests itself here (Fig. 2D). Then you have another cycle, here (Fig. 2C). And then you have Magnesium, Sodium here (Fig. 2B). And then here (Fig. 2A), you have the amino acid.

You can see how it sits. You have somewhere the Silica (Fig. 2E), around 28. And then it goes in the cycle. A combination of these packages leads, step by step, to the creation of the soul of man. (Fig. 2F). You have the beginning (Fig. 2A). You have the agents (Fig. 2B). You have the structure part of the physicality (Fig. 2C). The GANS condition of the physicality in dimension of creation. (Fig. 2D).

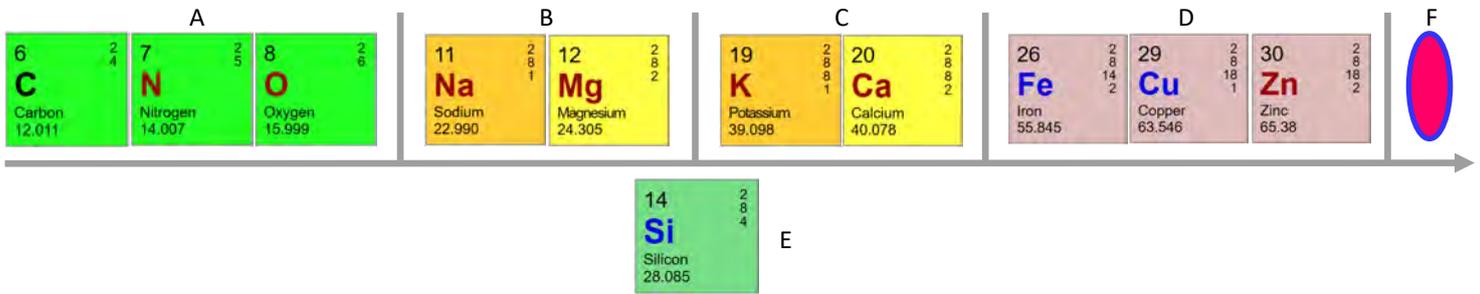

Figure 2

Life starts in the magnetic fields representing the field, becomes a plasma, that is the interaction of the fields; becomes one piece. Physics is interaction of two plasmas. The interaction of three plasmas becomes chemistry. The interaction of four become the physicality of the man. Fifth and the sixth becomes the soul of the man.

And strange enough, if you understand, it will come back to the beginning. Not only we have understood the conversion of the matter state to Nano, to GANS, and then from the GANS is a cradle of energy of the man, GANS to matter state.

Now we understand the whole cycle of the creation of the man itself.

That is why the soul of the man leads to the physicality of the man. This is why I tell you, you do not need to kill. You have to understand how to feed the physicality through the soul of the man.

There is no difference. You took a GANS, you took Copper, you made the Nano, you made the GANS out of it, you rotate the GANS, you come to the interaction of fields. You can make Gold and Silver and Copper from the energy of it back to the matter. The same is the soul of the man as a field creation of the physicality of the man.

How hard is for man to understand this simple process? Then why does man kill? That is so simple. Why man does not understand?

As the new cycle of knowledge, you speak about Silica. You separate the dimension of the physicality. You connect the dimension of the physicality to the point of the conversion. The dimension of the matter of state of physicality, this connects the dimension of the soul of physicality. Very simple.

(Azar) Thank you, Mr. Keshe.

(Mehran T. Keshe) Now I hope you know how to make a tooth grow. When I teach, I do not teach only the dimension of the physicality. I teach in the essence of the combination of the soul of the man, the essence of the creation, and essence of manifestation.

There is a big difference between the creation and manifestation. Creation has a birth, manifestation has a presence. Mankind lives through creation. The soul of the man lives through manifestation.

I have brought the whole cycle of the creation of the man never understood for billions of years. As I taught you many times, I can teach you everything about the creation. How many are there to understand the totality?

In time, mankind will understand.

# FIELD REPLICATION UNIT

## / CE Certified Medical Device Class I

At Keshe Foundation Manufacturing Austria we always work towards improving our products and to ensure they are fully functional at the time they reach your home.

After a period of research in which we had to play a bit on the composition of the GANSes surrounding the recipient with liquid, we are proudly presenting the latest version of the Field Replication Unit. the composition and the position of the GANSes is completed.

The set contains:

- ⇒ One glass jar
- ⇒ One cover for the glass jar
- ⇒ One elastic band to fit the GANS vials
- ⇒ 4 sealed GANS vials

The tests conducted in the laboratory have shown wonderful results on apples and oranges.

We encourage you to try any other aliments and to send us back your feedback upon using the Filed Replication Unit.

The Field Replication Unit is also used by specific groups who are dealing with the preparation of specific GANSes or GANS waters with the fields of it inside.

For these purposes this unit is more or less used daily in their work, for the creation of patches or loading the GANS water in reactor balls.

#### Utilization and maintenance:

The jar, the jar lid and the elastic band can be washed with warm water and mild dish soap.

Dispose in case of broken vials. Do not ingest the contents of the vials. The vials cannot and should not be opened. Upon delivery they are sealed very well and they are mounted on an elastic strap.

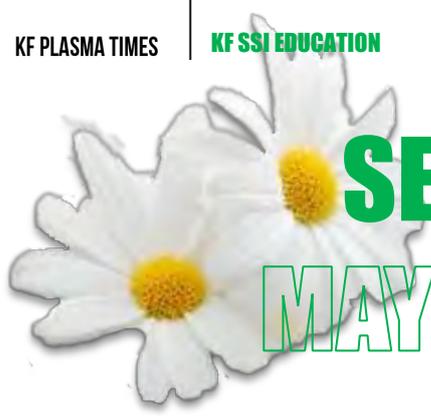

The fields of materials placed on the lid of the Field Replication Unit will be copied into the water, which is filled into the glass. There is no physical contact between the GANS inside the vials and the water in the center of the Field Replication Unit.

# SECOND TRIMESTER:

## MAY 6<sup>TH</sup> - JULY 24<sup>TH</sup>, 2019

by KF SSI Education

A warm "Welcome back" to a fresh start into the 2<sup>nd</sup> Trimester with the Keshe Foundation Spaceship Institute

**We welcome our existing students as well as our new students!  
May we share knowledge with each other and enlighten our paths.**

We will continue to spread the knowledge:

### Private Teachings:

- \* KF Ethos \* Space Technology knowledge \* Agriculture research \* Health & wellbeing \*
- \* Understandings of the works of Plasma \* Soul teachings \* Hands-on experiments & workshops \*

### Public Teachings:

- \* Mehran T. Keshe Knowledge Seekers Workshop \* Keshe Plasma Reactor Group \* Testimonial meetings \*
- \* One Nation One Planet One Race \* Carolina Keshe Knowledge Seeker Workshops \*

### Special Teachings:

- \* Private Agriculture teachings for farmers, producers, and growers \*
- \* Private Medical teachings for medical professionals and health practitioners \*

We are looking forward to meeting Knowledge Seekers from around the world to share our findings and broaden our mind. Volunteer helpers are always welcome to join in transcribing & translating videos as well as hosting our private classes.

Please get in contact with [education@kfssi.org](mailto:education@kfssi.org)

If you would like to join and be part of the exciting exchange amongst the private students, please apply to <https://keshefoundation.org/study-apply/>

Looking forward to seeing you on our start date **Monday, 6th May 2019**, join our classes in English, Bengali, Farsi, French, German, Hungarian, Polish, Romanian, Spanish and many more to come.

- Keshe Foundation Education Team -

# The goal for the

# Arabic community

by Jamila Melhli, UC Arabic

To date, we have not seen many implications from the Arabic community in Keshe Plasma Technology learning. While there are knowledge seekers working with Keshe Plasma Technology, unfortunately, they are not visible enough at the present time, including on social media. This remains a shy implication.

The goal, which we wish to achieve in priority, is, to be able to spread the knowledge of Keshe Plasma Technology to all Arabic speaking community, and of course to all the peoples of the world. However, there are still barriers to overcome and these will open over time.

In the Arabic countries, from North Africa to North East Africa and to the Middle East, there is a spectacular youth with enormous potential for learning. This beautiful youth is in a boil and seeks a horizon of a better future to project itself there. In search of solutions, they will find an answer from The Keshe Foundation and that answer is through the Keshe Plasma Technology.

Let us remember that the Arabic community has proved that it can shine by its wisdom, its mastery of science and the spreading of its knowledge, as well as by its multidisciplinary teaching. Today, the Arabic community reaffirms itself by relying on its youth.

We have faith in this young generation, which shines beyond the borders, beyond the nationality of origin, winning very beautiful awards, taking part in innovative reflections, in scientific fields such as medicine, innovation, and technology, among others.

Today, my wish is to set up Keshe Plasma Technology teaching centers in several countries, by setting up a center in the Maghreb (North Africa), a center in the Middle East and finally another center in East of Africa. These three geographical areas that will shine on a beautiful part of the community, first important implementation step.

Then in parallel, I would like to create Plasma Oasis in each of the 22 Arabic countries to meet the expectations of the communities. It will be about transmitting and developing locally Keshe Plasma Technology in several areas.

An approach through concrete and pragmatic projects will guide the local Knowledge Seekers in Agriculture, Health, Energy, Transportation, and many other areas. Thus, we will start this beautiful Plasmatic adventure that will trigger the desire and attraction of our Arabic community to join us.

What to do? Adhering to the call we are making to all our Knowledge Seekers of the Arabic community. With Keshe Plasma Technology, very nice projects are to be implemented, Agriculture constituting the first priority at the moment.

Let's join together, let's all build our peace. Let's be an actor for the future.

# Observation of the elevation of the Hydrogen Ion Potential (pH) of drinking water when in contact with the GANS / CO<sub>2</sub> Plasma

Author: C. Roberto Leandro

Published on: May 2019

## Subject

Addition of liquid plasma<sup>1</sup> (LP) of nanosized solid state gases (GANS) of carbon dioxide (CO<sub>2</sub>) in drinking water showed a change in the hydrogen ion potential (pH) of tap water and minerals.

This work talks about the possibility of improving water quality by raising the pH using Keshe Technology – a simple and efficient technology that can be made in your kitchen.

This study had an experimental character, through direct observations of the proposed experiment. It was carried out between February 24 and 27, 2019, in the city of João Pessoa / PB, average temperature of 29.6°C.

## Method

The objective of this work was to observe the elevation of the hydrogen ionic potential (pH) of the drinking water, from the addition of minimum percentages of LP (GANS / CO<sub>2</sub> plasma), with pH 9.7 (base). In order to observe one of the applications of plasma technology and Plasma Science.

*“This technology starts with two very simple procedures: Nano-coating metals and the capture of GANS / Plasma which can be performed by anyone in your kitchen or in the garage”*

*(KESHE, 2019)*

It is known that the alkalinity of water, within limits, is positive for human health. Nobel laureate Otto Warburg, with his discovery that cancer develops in acidic environments, shows that it cannot develop in the alkaline environment.

In addition, a person with cancer has a tissue pH of 4.5, is a microenvironment poor in oxygen. (PAULINO, 2012)

## Results

In the samples there was elevation of the pH, as shown in the Table 2. The results are arranged and all the samples selected to compose the research.

Tap water from Companhia de Água e Esgotos de Paraíba (Cagepa) [Paraíba Water and Sewerage Company] usually ranges from pH 6.6 to pH 7.5.

<sup>1</sup> Liquid Plasma (LP) is the name of water that is in direct contact with the GANS, which is intensely energized due to this direct contact. The LP was diluted in potable water at concentrations of 1%, 2% and 3% (see Table 2)

<sup>2</sup> Informed water is one that does not receive additional of LP, but is subject to externally positioned LP fields and GANS.

Table 2: pH demonstration of selected samples.

pH Measurement	Cagepa 1 +(1%) LP	Cagepa 2 +(2%) LP	Cagepa 3 +(3%) LP	Indaiá.C1 +(3%) LP	Cristal.C2 +(3%)LP	Informed water
Initial pH	7.5	7.5	7.5	5.5	5.9	8.0
pH +24h	7.9	7.8	7.9	6.3	6.9	7.9
pH +48h	7.9	7.9	7.9	6.5	7.1	8.0
pH +72h	8.0	8.0	8.0	7.0	7.4	8.0
Results	0.5	0.5	0.5	1.5	1.5	

In the present study, the collected water indicated pH 7.5 (Cagepa 1, 2, and 3) and the final pH result after 72 hours was elevated by 0.5 – identical in all samples, although different percentages of LP (1%, 2% and 3%, respectively).

Commercial waters, sold in markets (samples C1 and C2), raised the pH by 1.5 – going from acid to alkaline.

Informed water<sup>2</sup> with CO<sub>2</sub> LP, where there is no physical contact with GANS / Plasma, presented pH 8.0 (alkaline) at the beginning and at the end of this study.

Therefore, it can be shown that the fields, created by the GANS influence the matter and make the water basic / alkaline.

#### Note:

The Plasma Technology is being developed and made available on an open platform since 2014, all the knowledge is offered to the public, in several languages, including in Portuguese by the platform: <https://kfssi.org> (KESHE, 2019).

# GANS WATER FOR SECOND DEGREE BURNS

## Subject

This paper documents GANS plasma technology method of dealing with skin burns.

## Method

- CO<sub>2</sub> GANS water in moderation
- CuO GANS water in moderation
- ZnO GANS Water in moderation
- Gauze x 1

## Usage

1. Spray GANS water on the burns for the first time when it was burnt. 1:1 CO<sub>2</sub> GANS water and CuO GANS water.
2. Do not cover anything, directly blow the scald with a fan until the hot tingling sensation of the surface disappears. The upper layer of water sprayed on the surface of the skin will evaporate while blowing cold. Please spray immediately when the skin is blown to the semi-dry. Depending on the degree of scald, it may vary from 30 minutes to several hours.
3. After the surface of the hot tingling sensation disappears, you will feel a burning sensation deep inside the skin. In this case, please cover the entire surface of the skin with gauze or cotton pad or clean paper towel soaked with ZnO GANS Water. It is 5 cm more outward than the burn. (At this time, people who are sensitive may feel the spur of the movement moving. Please spray "ZnO GANS Water" on the path of the burning sensation.)
4. At this point, you do not need to continue to blow the fan, but keep the gauze completely wet until the gauze is removed for more than three minutes, and the burning sensation in the inner side of the skin does not reappear.
5. Usually the next day will not feel the pain of burns, even if the small blisters appear still does not hurt, after the body cells will take over, and after few days later will be recovered.

## Observations

Compared with general scald treatment, the scald pain can be reduced to a tolerable level within 5 minutes.

## Results

This method is effective and feasible and can be applied repeatedly.

# MY QUESTIONS STARTED GETTING ANSWERED

by Bente P., May 2019

I am sitting studying Mr. Keshe's Book 2 "The Structure of Light" Chapter 3 and 4 on GANS - what it is and how and why its produced etc... And I look at all my books and notes on especially Physics I made on my full-time study for 4 years... 2013 through 2016... and honestly

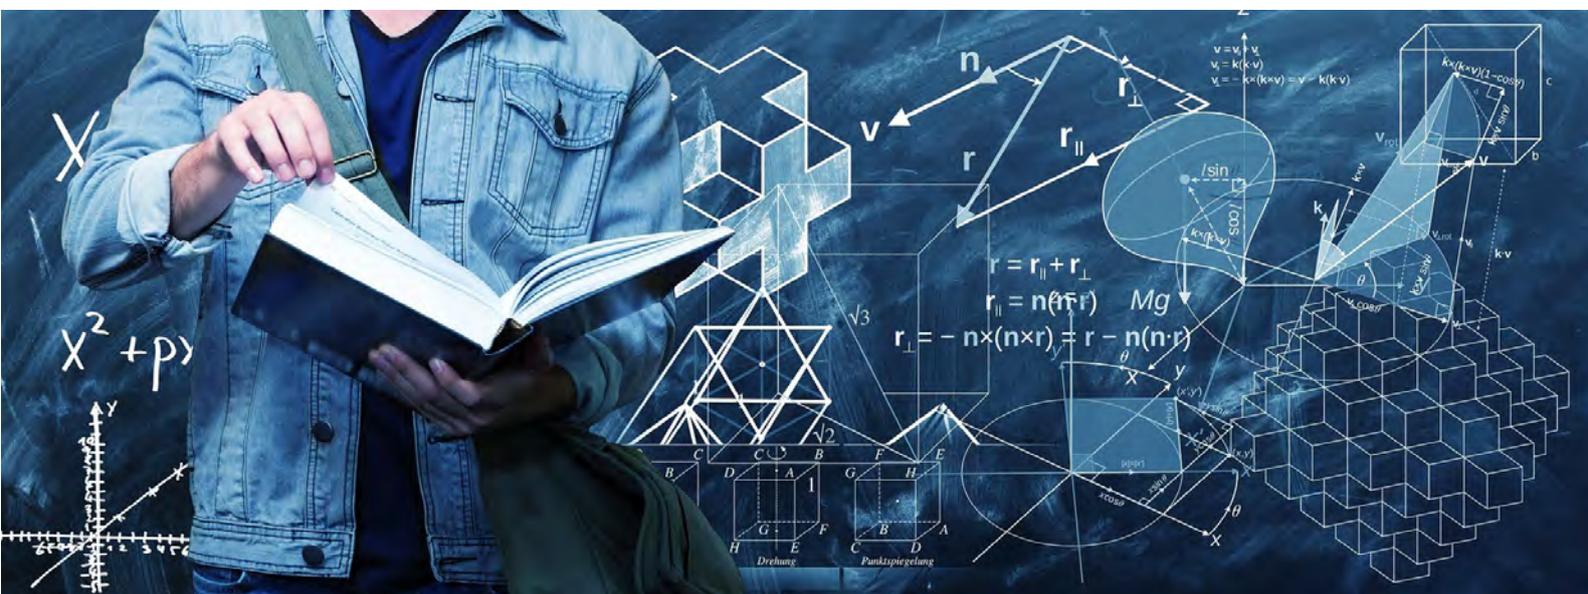

THAT STUFF IS SO OBSOLETE.

When I retired there was something very specific I wanted to know. So, I upgraded my Physics and Math knowledge (from 1960) enrolled in the most progressive university in Denmark - 'Molecular Biology' I thought would be the answer - but OMG after 6 months I realized I wasn't going to get to know what I wanted to know this way !!!

Then studied "at home" full-time Biology, Chemistry, Physics - that latter (Physics) took me to all sorts of interesting stuff but, left me with more questions, obviously.

Until I 'discovered' M.T. KESHE Plasma Science in early 2017 and my questions started getting answered ... about the universe(s) - about life in all its forms - it just makes so much sense - Lucky me!

AND THANKS A MILLION TO Mr. Keshe and to all the people who have helped and are helping to get the Science known !!!!!

“

# HOST WANTED

FOR PRIVATE TEACHINGS IN ENGLISH

We are looking for volunteers to host our Private Teachings in English. This position will be a part time position. Several people will fill this position, sharing hosting duties each week. This allows 2-4 people to share hosting duties each week for our private classes.

## REQUIREMENTS:

- A recent computer within the last 5 years. Windows 7, 8 or 10 or MacOS 10.9 or later system;
- Desktop or Laptop computer only. Zoom hosting from tablets or phones not acceptable;
- The latest version of Zoom installed on the computer;
- 6-8 GB of RAM or more;
- 3D graphics card recommended, but not required, most newer systems have them built-in;
- **TWO MONITORS required!** (Most systems have HDMI out. You can easily hook up a TV) ;
- Fast internet speed (**Please test your internet speed at [www.speedtest.net](http://www.speedtest.net) and report findings below**);
- Minimum of at least 3-5 Megabit upload and 10 Megabit download. Anything less than this will hinder sharing full screen videos. Optimal is 10 Mbit up 50Mbit down or higher. The faster the better!
- Decent headset required, preferably with noise canceling microphone. (example: Sennheiser PC-151 headset) o Built-in computer microphone is only acceptable as a backup;
- KfSSI Student ID required;
- Clear understandable English-speaking voice;
- Technically proficient in running your computer and operating system with basic operation, troubleshooting and analytic skills;
- Ability to multitask or willingness to learn: opening and sharing in zoom various file types, pictures, movies and switching between them while listening to teacher & interact as host when needed and keep track of chats.

# ABC

of publishing in

## PLASMA SCIENTIFIC JOURNAL

### A. Prepare your work

Firstly, you need to prepare. You can either document the work which has already been done and perhaps even presented by you in the testimonials meeting or website, or you can plan a new experiment. You should always be clear on what you are trying to achieve and document everything as you go (label and take pictures).

### B. Write your paper

Gather all the notes and pictures together and when writing your paper put yourself in the reader's shoes. Do not assume anything but present everything from the start, explaining every aspect of the experiment, which may not be obvious, and remember that "a picture is worth a thousand words". If needed, relate to other peoples' work by referencing their articles, websites or other openly available resources. Start by downloading the Scientific Plasma Journal template and short guide for authors available at

<https://support.keshefoundation.org/faq.php?section=science-journal&qid=189#q189>

### C. Upload and submit

Once finished, upload your Word, OpenOffice or PDF file onto one of the cloud or filesharing services, or even onto Facebook. Go to <https://support.keshefoundation.org> and from the drop-down menu select Plasma Scientific Journal Submissions and press Go. Through this website, you can either submit your work, ask a question or access resources and the FAQs.

Any question? Get in touch with us via

<https://support.keshefoundation.org>

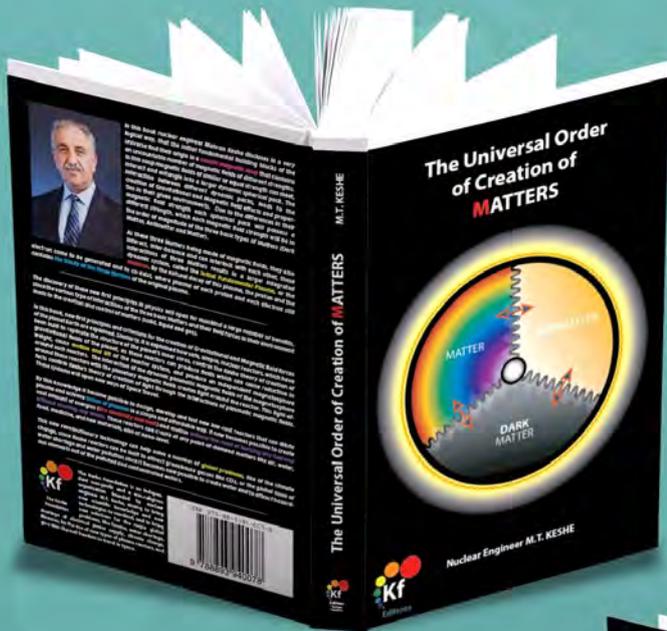

The full version of this article, author guide, and templates also available at:

<https://keshefoundation.org/education/news/kf-ssi-education/plasma-scientific-journal/plasma-scientific-journal>

**Submit your publication today! Be the Creator and shine for others to see your beauties.**
